

ENVIRONMENTAL EDUCATION WORKSHOP

*Teaching students **HOW** to think, not **WHAT** to think about environmental issues.*

Arkansas Project Learning Tree (PLT) and Arkansas Project WILD announces a workshop designed specifically to connect school teachers, natural resource professionals, and Arkansas Tree Farmers. PLT and WILD builds on children's sense of wonder and provides an early foundation for developing positive impressions about nature and lifelong social and academic skills. This workshop is designed for both classroom teachers and non-formal educators alike. It will provide the skills and tools necessary to teach children about the importance of forestry, wildlife, and natural resource management in Arkansas. Workshop includes:

Qualifies for 6 hours of ADE Professional Development

- Hands-on activities you can use for classroom visits or field trips plus instruction on how to use the PLT and WILD activity guides to locate activities and resources;
- Sharing ideas, information and resources with other landowners, classroom teachers, and natural resource professionals;
- Activity Guides - each participant will receive three curriculum activity guides with over a hundred hands-on, minds-on activities that teach critical thinking and problem solving skills;
- Lunch (you must register online or contact Rob Beadel to sign up)
