EXHIBIT GUIDE
TUESDAY, APRIL 9, 2019
3:00 – 6:30 P.M.
Philadelphia Marriott Downtown
Franklin Hall, 4th Floor

Sponsored by:
RECEPTION ExxonMobil  •  5:00 – 6:30 p.m.
Reserve your booth space for 2020 today!

Stop by the convention registration desk or the WAC2020 Information Center located on the 5th floor.

Sign up early! Booths are assigned on a first come, first serve basis.
Welcome to ASC’s EXPO!

ASC’s Marketing Committee is pleased to welcome 110+ exhibiting companies to the 2019 Annual Spring EXPO.

The EXPO is where you will meet with some of the leading companies that support the adhesive and sealant sector, gain an appreciation of what they can do for your company, and set up the important one-on-one meetings to move a project forward.

The EXPO Guide provides you details on the exhibiting companies and their location within the exhibit hall, and should help streamline your time in locating potential suppliers, or assist you with locating current innovations. Review the list of participating companies, learn what products they offer, and then set up a booth visit plan in order to ensure you connect with the innovative companies that are found throughout the EXPO.

Also, during the three hours don’t miss the opportunity to win an Apple iWatch, Digital Camera or Apple iPad. Stop by Velsicol Chemical (booth 302), Wacker (booth 510/512) and Kraton (booth 101/103). Also, make sure you stick around for the EXPO reception sponsored by ExxonMobil.

Show your appreciation for the support they are providing the industry by making sure you stop by as many companies as you can.

Thank you for attending and participating in our innovation showcase.

Sincerely
ASC’s Marketing Committee

Arkema Coating Resins

Contact: Cindy Fruth
Marketing Manager
410 Gregson Drive
Cary, NC 27511
Phone: (919) 364-0059
Email: cindy.fruth@arkema.com

Waterborne binders from Arkema Coating Resins and rheology modifiers for waterborne systems from Coatex. For use in caulks and sealants, mortars and grouts, construction adhesives and admixtures.

ARLANXEO USA LLC

Contact: Caitlin Leopold
Communications Manager North America
111 RIDC Park West Drive
Pittsburgh, PA 15275
Phone: (412) 809-2242
Email: caitlin.leopold@arlanxeo.com

ARLANXEO is a world-leading synthetic rubber company with twenty production sites in nine countries. The company offers a broad portfolio for the adhesives and sealants industry, including Levamelt® EVM, Baypren® CR, Keltan® EPDM, Baymod® N/Perbunan®/Krynac® NBR grades and X_Butyl® products.

BASF Corporation

Contact: Kathleen Blauvelt
Account Manager
100 Park Avenue
Florham Park, NJ 07932
Phone: (973) 936-4641
Email: kathleen.blauvelt@basf.com

BASF offers the broadest line of polyisobutylene for pressure sensitive, hot-melt and solvent-based adhesives. Oppanol® PIBs provide an excellent barrier against moisture, great adhesion and tack to many surfaces, and cold flow for self-healing features. To learn more, please visit www.basf.us/pib_derivatives.
BOOTH 505

Bitoner Resin Co., Ltd.

Contact: Kiki Pan
Marketing Director
6# Shandong Road
Qingdao, China 266071, China
Phone: 86 532 55662731
Email: kik_pan@bitoner.com

Bitoner Resin is one of leading hydrocarbon resin suppliers from China. With more than ten years’ experience specializing in developing and promoting hydrocarbon resins, it has been enjoying popularity and good reputation in almost 40 countries and areas. From 2010, Bitoner Resin started focusing on Adhesive industries and gained approvals from some well-known PSA and HMA producers in the world.

BOOTH 205 **

Boron Molecular Inc.

Contact: Ken Sullivan
Director, Sales & Marketing
2650 Discovery Drive, Suite 110
Raleigh, NC 27616
Phone: (919) 981-4441
Email: sales@boronmolecular-usa.com

Boron Molecular is a leading chemical manufacturer specializing in fine chemicals and RAFT agents which are used in controlled radical polymerizations for making better polymers. RAFT is broadly applicable to polymers particularly in the areas of coatings, adhesives & lubricants.

Strong & Mighty
High bulk density, easy to add, anti-sag, and easy incorporation.

Visit booth 405 to learn more!
Braskem is a leading global chemical company with a broad portfolio of polymers and specialty chemicals for the adhesives market, including hydrocarbon resins (HCR’s), Polyisobutylene (PIB) and EVA. With strong innovation capabilities, the company is constantly offering new and higher performance products to the adhesives industry.

BYK USA Inc.

BYK is a leading global supplier of specialty additives for adhesives and sealants. BYK’s wetting and dispersing additives, surface additives, defoamers & air releases, rheology modifiers, adhesion promoters, wax and nano additives are used to optimize production and application processes, and to improve the qualities of the finished products. As one of the most innovative companies, BYK invests 8% of earnings each year in research and development - a figure that is three times the industry average. Innovating superior additives to meet our customer’s current and future needs is always BYK’s main focus.

Cardolite Corporation

Cardolite Corporation is the world leader in developing and manufacturing cashew nutshell liquid(CNSL) based products, and CNSL is a natural, non-food chain, and annually renewable biomaterial. Various industries including coatings, adhesives, composites, and friction materials, have taken advantage of unique properties offered by CNSL based curing agents, epoxy products, and polyols.
**BOOTH 800**

Chemspeed Technologies, Inc

Contact: Stephen Zigari
Sales Executive
113 North Center Drive
North Brunswick, New Jersey 08902
Phone: (732) 329-1225
Email: stephen.zigari@chemspeed.com

Chemspeed Technologies is the leading provider of high-throughput and high-output research & development workflow-solutions from single bench-top/stand-alone automated workstations (powder dispensing – sample preparation – synthesis – process development – formulation – application – testing) up to complete and integrated product development workflows for the entire product development processes in the Paints, Coatings and Adhesives Industries as well as many others.

Enercon Industries

Contact: Ryan Schuelke
Vice President, Sales
W140N9572 Fountain Drive
Menomonee Falls, WI 53051
Phone: (262) 255-6070

Enercon atmospheric plasma surface treaters improve adhesion for a wide variety of applications. Improve bonding for both conductive and non-conductive surfaces. Choose from air plasma, Co2 plasma, variable chemistry plasma and flame technologies. Take advantage of our free laboratory trials and leading application expertise. Visit www.enerconind.com/treating for more information.
EPS Materials

Contact: Nancy Metzger
Sales & Marketing Support
1400 North State Street
Marengo, IL 60152
Phone: (815) 568-4178
Email: nmetzger@eps-materials.com

EPS is a leading supplier of cutting-edge, compliant acrylic emulsion technologies as well as conventional resins to serve the Architectural, Industrial, Construction, Adhesives and Sealants markets.

Evonik Corporation

Contact: Danielle Deluccia
Communications Specialist
299 Jefferson Road
Parsippany, NJ 07054
Phone: (973) 541-8000
Email: danielle.deluccia@evonik.com

Evonik Corporation offers AEROSIL® fumed silica, AERODISP® (aqueous dispersions of fumed silica), Dynasylan® silanes, and Sipernat® performance silicones for the adhesives and sealants industries. AEROSIL® fumed silicones can be used to increase viscosity and reinforcement, Dynasylan® silanes are excellent adhesion promoters, and Sipernat® offers performance silicones with better application properties. Polymer ST and TEGOPAC® are a complete product line of unique silane-modified polymers allowing customers to reach a broad number of applications within the adhesives and sealants market. DYNACOLL® polyester polyols and DYNACOLL AC® polyacrylates are well recognized raw materials in the production of PUR hot melts, VESTOPLAST® (amorphous poly-alpha-olefins) is a key ingredient in polyolefin-based hot melts and POLYVEST® polybutadiene resins are designed for a use in rubber-based sealants.

Excalibar Minerals LLC

Contact: Mark Brooks
Director, Sales & Marketing
21920 Merchants Way
Katy, TX 77494
Phone: (832) 459-0219
Email: mbrooks@excalibar.com

Excalibar is a quality processor and supplier of industrial minerals including barium sulfate and calcium carbonate. Our services include sourcing, processing, packaging and distributing high quality minerals used as fillers/extenders in adhesives, plastics, coatings, rubber, ceramics and oil service end products.

Fenchem Inc.

Lawter, part of Harima Chemicals, Inc., is a company strong in pine chemicals and built on products developed using pine chemical resources. Lawter serves the graphic arts, adhesives, specialty coatings, aroma chemicals and the synthetic rubber industries. To optimize the performance of your adhesives, Lawter offers a complete range of natural tackifier resins and tackifier dispersions. A major part of our raw materials are derived from renewable sources such as rosin tapped from pine trees and derived via the pulp making process for the paper industry. Environmental sustainability is a key benefit of Lawter’s products - but it’s just the beginning. Our tackifier resins, ideal for hot melt adhesives and road marking applications, are light-colored, stable, and compatible with a wide range of polymers. Our waterborne tackifier dispersions provide excellent stability and cohesive strength for a variety of pressure-sensitive and non-pressure-sensitive adhesives. New from Lawter, FH 95G, a fully hydrogenated wood rosin dispersion based on our patented G stabilization technology.

RSS is a wholly owned subsidiary of The Dupps Company, an 83 year old, fourth generation family manufacturing business. RSS makes a unique family of organic-encapsulated inorganic composite powders. Harmonite® powders are being used as cost effective base components for new formulations and as specialty additives to existing formulations in pressure sensitive adhesives, coatings, sealants, rubber compounding and other applications like sporting clays. Harmonite has been shown to improve tack, increase viscosity, shorten cure times and improve durability in applications like window flashing tapes, roofing mastics, self-adhering roof underlayments and other products.

Sasol Performance Chemicals

Contact: Bob Dixon
Sales Manager
12120 Wickchester Lane
Houston, TX 77079
Phone: (832) 920-8389
Email: bob.dixon@us.sasol.com

Sasol’s Performance Chemical’s Wax Division has expanded and is the leading specialist in Innovative Wax Technologies. Our Fischer Tropsch Waxes are used extensively in the Hot Melt Adhesive Industry, complemented by our Paraffin and Microcrystalline waxes. We are also introducing new FT Waxes for the Non-Woven market.

Scott Bader, Inc.

Contact: Ryan Yaworski
Sales & Product Manager
4280 Hudson Drive
Stow, OH 44224
Phone: (330) 920-4410
Email: ryaworski@scottbader-na.com

Scott Bader is a global manufacturer of Texipol® inverse emulsion thickeners and Texicryl® water based acrylic binders and thickeners for adhesives, sealants, and sealable coatings. Our unique structure makes us an ideal sustainable business partner. We are headquartered in the UK, with local offices in Ohio.
Soudal markets an extensive line of sealants and adhesives products under the BOSS label serving many industrial markets. We manufacture neutral cure silicone sealants, Firestop caulks, silicone compounds, latex and hybrid sealants. In addition, we custom/contract package one and two component adhesives, sealants, and other chemicals.

Specialty Minerals is a leading manufacturer of minerals additives such as calcium carbonate, talc, limestone and dolomite used in applications for sealant, automotive, construction and adhesive. We provide mineral additives for rheological control of high performance Automotive and Construction Sealants. Our ultrafine surface treated precipitated calcium carbonates; ULTRA-PFLEX®, THIXO-CARB® and CALOFORT®, are engineered for sag resistance and viscosity control. Our mineral additives provide cost effective solutions for automotive (underbody, seams, joints) and construction (insulated glass, glazing) sealants with PVC plastisol, polyurethane, silicone, polysulfide, MS polymer and other resin chemistries.

Saiden Technologies is now STI Polymer and while our name has changed the quality of our products have not. Our familiar Saitack line of pressure sensitive acrylic polymers, covering a range of applications from construction adhesives to tape and label adhesives will continue to be manufactured to the highest standards in our Sanford, NC polymerization facility for demanding applications throughout the Americas.

Phone: (609) 918-0529
Email: jeanneh@texturetechnologies.com
Texture Technologies Corporation will demonstrate the TA.XTPlus Texture Analyzer, software and fixtures for measuring adhesive properties of adhesives and sealants. The TA.XTPlus provides extremely repeatable results for quantifying tackiness, adhesiveness, cohesiveness, peel strength, stringiness, green strength, cure rate and other properties of adhesives, sealants, hot melts, glues, resins, waxes, caulkins, gels, creams, lotions, petroleum products and mucoadhesives. The TA.XTPlus is simple to use and better differentiates adhesive materials than many traditional industry methods.
Visit with us at Booth 114!

CONTRACT MANUFACTURING OF POLYURETHANES
Specialists in PUR Coatings, Adhesives, Sealants, & Elastomers

Contract Manufacturing Processing Technologies:
- Reactive Hot Melt Adhesives (HMPUR)
- Urethane Prepolymers (MDI, TDI & Aliphatics)
- Pigmented or Filled Polyurethanes & Polyols (up to 60% Filler Loads)
- Liquid PURs & Cast Urethanes
- TPU (Thermoplastic Polyurethanes)
- Full Service Contract Manufacturing from Lab Scale to Full Production
- Decades of Experience
- Over 200-Million Pounds of PUs Manufactured
- ISO 9001-2015 Certified

Our Manufacturing Equipment Includes:
- Production Reactors: 4,800 (2), 3, 750 (4), 1,500, 500 (2) & 250 Gal
- Five Scale-Up Reactors: 500, 250, 25, 15, & 5 Gal
- Reactors 316 Stainless, Full Vacuum, Pressure Rated
- Operate Under Closed Conditions
- Charge from Bulk, Drum, Tote & Bags
- In-line Filtration (10-800µ) and Jacketed Draw-Off Lines
- Nitrogen & Argon Piped to Reactors & Packaging Areas
- Complete Heating & Cooling Systems
- NMP Process Cleaning System
- Packaging in Tanker Trucks, Totes, Drums, Pails, Slugs & Cartridges

WACKER Adhesive, Caulk and Sealant Solutions support multiple construction applications in the categories of walls, flooring, façades & roofing, concrete & masonry, window & door, and wet areas. For Compounders, WACKER’s adhesive and sealant raw materials selection is basic in three polymer technology platforms: GENIOSIL® Silane Modified Polymers; Silicone Polymers and Plasticizers; VINNAPAS® and VINNOL® - Vinyl acetate ethylene copolymer dispersions and ethylene vinyl chloride copolymers. Our comprehensive product line is completed by our functional additives: HDK® Fumed Silica for rheology control and reinforcement, cross-linkers & chain extenders, silanes for adhesion promotion and water scavenging, primers, catalysts & defoamers. For Repackers WACKER’s extensive RTV-1 product portfolio (GENIOSIL® N based on silane modified polymers and ELASTOSIL® based on silicones) offers a broad range of off-the-shelf custom solutions.

WACKER is committed to providing technical expertise and customer service matched to your particular application, need or industry. WACKER, the Munich-based chemical company is one of the world’s leading and most research-intensive chemical companies, with total sales of €5.3 billion (2015). Products range from silicones, binders and polymer additives for diverse industrial sectors to bioengineered pharmaceutical actives and hyperpure silicon for semiconductor and solar applications. WACKER is represented in the Americas by Wacker Chemical Corporation, Adrian, MI USA. Contact our Information Services Manager.

Wealth Ocean Inc.
