ABOUT ASDIN...

Founded in 2000, ASDIN’s mission is to promote the appropriate application of new and existing procedures in order to improve the care of patients with kidney disease. These procedures include, but are not limited to, insertions of tunneled hemodialysis and peritoneal dialysis catheters, endovascular procedures, and diagnostic sonography. The Society works closely with other societies and with nephrology training programs to achieve its goals. All physicians (nephrologists and others), administrators, technologists, and nurses involved with the care of nephrology patients are invited to join and become active in the Society.

Activities of the Society include:
• Establishment of practice standards
• Certification of physicians in specific procedures
• Accreditation of training programs in specific procedures
• Development of training tools and techniques
• Sponsoring symposia and training courses
• Dissemination of information through periodic meetings and through print and other media
The ASDIN 11th Annual Scientific Meeting will start with a full-day Hands-on Workshop. Hands-on sessions provide an opportunity not only to learn/improve new skills, but also to interact with experts and gain from their experiences. Based on feedback from prior meetings, hands-on time at the workshop has been expanded to all day! Participants, divided into small groups, will rotate through several stations (Coils, Stents, Snares, Peritoneal Dialysis - both Fluoroscopic/Peritoneoscopic, and Port-a-Catheter). This Pre-Course will include a bonus session on advanced surgical techniques in management of access dysfunction. Dr. John Ross will discuss use of advanced vascular access in patients with difficult access.

ANNOUNCING FIRST INTERVENTIONAL NEPHROLOGY TRAINING FELLOWS PRE-COURSE!

To address Nephrology Fellowship Procedural Milestones

Nephrology Graduates are required to be competent in Renal Biopsy, Central Venous Catheter Insertions, and Management of Dialysis Vascular Access. ASDIN is pleased to announce a Hands-on workshop for Nephrology Fellows to address Nephrology fellowship procedural milestones. Simulation models for Renal Biopsy, Central Venous Catheter Insertion, and Vascular Ultrasound will provide opportunity to acquire required skills. Physical exam of vascular access will be valuable experience to develop competency in diagnosing vascular access dysfunction. Group discussion and literature review will provide answers to several practical questions on access management: when and what arterial venous access to place and how to manage dysfunctional access (AVF, AVG, and Catheters).

FELLOW SCHOLARSHIPS AVAILABLE

ASDIN is providing twenty (20) registration scholarships for this Interventional Nephrology Fellows Pre-Course. Scholarships are limited to two per training program and awarded on a first come, first serve basis. In order to be considered for the Pre-Course registration scholarship, Fellows should submit the completed registration form on page 10 of this brochure along with a letter of recommendation signed by their training program director. The form and letter may be submitted by email, info@asdin.org, or faxed to 601-924-6249. First come, first serve and program limits will be strictly enforced.
