FACING THE FUTURE: NEW DIRECTIONS, NEW POSSIBILITIES

February 21-23, 2020 | The Mirage | Las Vegas, NV

Program Chairs: Jeffrey Hoggard, MD, FASDIN & Micah Chan, MD, MPH, FASDIN
Did you attend ASDIN’s Annual Scientific Meeting in Atlanta last February? If not, you missed an extraordinary meeting that lived up to the objective of planning the best ASDIN Scientific Meeting to-date. But we’re not stopping there...building on last year’s program success, ASDIN is planning another extraordinary, multidisciplinary meeting focusing on the field of dialysis vascular access and how the field is changing and evolving. There is vibrance and energy generated by new technology and new roles for providers. ASDIN will continue to offer last year’s sold-out introductory Ultrasound PreCourse, another special session in collaboration with the Vascular Access Society of the Americas, and an expanded case presentation session. And, we will be adding comprehensive POCUS and PD general sessions this year. The draft schedule is brimming with timely topics.

ASDIN is THE organization that is defining the field of interventional nephrology while giving structure and identity to all specialties that perform diagnostic and vascular access procedures. Our overarching mission to promote excellence in dialysis access care to improve outcomes for patients with kidney disease widens the tent to include everyone. Your active sponsorship, corporate partnership, and participation as an exhibitor not only supports ASDIN’s Annual Scientific Meeting, but supports the members and mission of ASDIN through the year.

This year’s meeting site offers inexpensive airfare (with robust flight schedule options) and affordable but luxurious accommodations. The Mirage, the meeting headquarters hotel, offers only one tower and easy access to our meeting space. Join us February 2020 on the Las Vegas Strip! #ASDIN2020
