Corrigendum

Page 254, left hand column, third paragraph, the first sentence “For prescribing the dose of CAPD in patients with known residual renal function, the same Dv/V value, 0.304 (l/24 hours)/l, should be entered in Eq. (3), but the target Kpt/VUrea should be 1.70 – renal weekly Kt/VUrea.” is in error. The following two sentences should be substituted for this sentence:

“For prescribing the dose of CAPD in patients with known residual renal function, the same Dv/PUrea value, 0.8, should be entered in Eq. (3), but the target Kpt/VUrea should be 1.70 – renal weekly Kt/VUrea. From Eq. (3), the target Dv/V decreases by 0.018 (l/24 hours)/l for 0.1 increase in renal weekly Kt/VUrea.”
