LIGHTING THE NIGHT
A workshop on outdoor lighting design, practices, and community controls.

Friday, February 1, 2013 ~ 3:00-7:00 PM
Registration begins at 2:30 PM

Lighting can make home and commercial landscapes:
Safer at night — or more hazardous
Neighborhood enhancing — or create nuisances
Compatible with habitats — or disruptive of natural systems

This workshop will help you avoid the issues of glare, light trespass, overlighting and light clutter. You’ll learn the technical, aesthetic and legal aspects of how your lighting program can be a community asset and what light works best for a particular use.

Valuable to planners, architects, landscape architects, engineers & those interested in the growing field of outdoor lighting control.

PROGRAM
Allen M. Weiss, PE, LC, MIES, SESCO Lighting, Roland Magyar, AICP, City Planning; Bob Parks, International Dark Sky Assoc. (IDA) followed by tour of Harmony lighting with Greg Golgowksi, AICP.
Program sponsored by the Central Florida Chapter of IDA and Harmony Conservation.

LOCATION
Graze Restaurant at Harmony, 7251 Five Oaks Drive, Harmony, FL 34773
