

ASNM
American Society of
Neurophysiological Monitoring

Dear ASNM Members,

The ASNM Board believes it is crucial at this time, to publicly state our support for each and every patient, member, colleague and other healthcare professional regardless of his/her race, religion, ethnicity, or sexual orientation.

We recognize that many people are hurting right now. As health care providers and clinicians of diverse backgrounds who treat patients of every background, we remain committed to continuing to promote diversity, inclusivity, and equality within the entire IONM field.

The ASNM has been taking steps to ensure our Society embraces and promotes diversity and inclusion. The creation of the Diversity Taskforce in 2019 is one of those steps and will serve to make sure our Board and membership embody and promote equality in our field. We will continue to build upon this taskforce to ensure a brighter future for the ASNM and all providers in this field.

Respectfully,

The ASNM Board of Directors
