

Table of Contents

Chapter 1	The History of Transport	1
	Critical Care Air Medical Transport.....	1
	Critical Care Ground Medical Transport.....	3
	Air & Surface Transport Nurses Association.....	4
	International Association of Flight & Critical Care Paramedics	7
Chapter 2	Transport Physiology	13
	Atmosphere	13
	Physical Gas Laws	15
	Pressurized and Unpressurized Aircraft Cabins	18
	Stressors of Transport: Hypoxia.....	20
	Stressors of Transport: Barometric Pressure.....	24
	Stressors of Transport: Temperature.....	28
	Stressors of Transport: Gravitational Forces.....	29
	Stressors of Transport: Noise.....	30
	Stressors of Transport: Vibration.....	31
	Stressors of Transport: Fatigue.....	32
	Other Physiologic Stressors of Transport.....	33
Chapter 3	Program Operations	37
	Performance Standards and Training.....	38
	Pre-mission Planning.....	43
	Medical Direction	45
	Communications	45
	Incident Command System/Unified Command	51
	Mission Safety Considerations	53
	Equipment and Scene Safety.....	55
	Safety Culture.....	57
	Safety and Survival.....	58
	Hazardous Materials Incidents.....	61
	Mass-Casualty and Disaster Incidents.....	63
	Wellness Issues for Critical Care Transport Professionals	67
	Stress Issues for Critical Care Transport Professionals.....	70
Chapter 4	Air and Surface Operations	77
	Transport Decisions.....	78
	General Aviation Concepts.....	78
	Approach to Air Medical Safety.....	83
	Flight Operations.....	86
	Aircraft Emergencies	89
	Ground Transport Operations	91
	Equipment and Medications.....	93

Chapter 5	Safety and Safety Management Systems	95
	History of Industrial Safety in the United States.....	95
	Accident Causation Models.....	96
	Safety Management Systems.....	99
Chapter 6	Professional Issues	103
	Standards of Care and Performance.....	104
	Scope of Practice.....	105
	EMTALA and Principles of Patient Transfer.....	106
	Medical Malpractice.....	107
	Principles of Transport Documentation.....	108
	HIPAA and Protected Health Information.....	109
	Quality Management.....	112
	Research in Critical Care Transport.....	114
	Community Outreach and Education.....	118
	Program Development.....	118
Chapter 7	Medical Assessment and Patient Transport	123
	Primary Assessment.....	123
	Secondary Assessment.....	127
	Approach to General Medical Patients.....	133
	Patient Preparation and Transport.....	134
	Special Considerations in Medical Patient Assessment.....	136
Chapter 8	Airway Management	139
	Airway Assessment.....	139
	Basic Airway Interventions.....	140
	Airway Adjuncts.....	141
	Endotracheal Intubation.....	143
	Surgical Airway Management.....	146
	Rapid Sequence Induction (RSI) Intubation.....	146
	Additional Airway Maneuvers and Adjuncts.....	150
	Considerations for Special Populations.....	152
Chapter 9	Mechanical Ventilation	155
	Mechanical Ventilation in Transport.....	155
	Modes of Ventilation.....	156
	Medical Conditions Requiring Mechanical Ventilation.....	158
	Medical Conditions Requiring NPPV.....	159
	Monitoring ECMO Patients During Transport.....	161
	Monitoring Ventilated Patients During Transport.....	162
	Considerations for Special Populations.....	163

Chapter 10	Perfusion	165
	Respiratory Physiology	165
	Pathophysiology of Shock	167
	Trauma Triad	168
	Acid-Base Imbalance	169
	Approach to Patients with Inadequate Perfusion	170
	Considerations for Special Populations	172
Chapter 11	Trauma Assessment and Patient Transport	173
	Triage Principles	174
	Mechanisms of Injury and Kinematics	174
	Approach to Trauma Patients	177
	Patient Preparation and Transport	178
	Considerations for Special Populations	180
Chapter 12	Neurologic Trauma	185
	Traumatic Brain Injuries	185
	Spinal Cord Injuries	190
	Considerations for Special Populations	193
Chapter 13	Thoracic Trauma	197
	Tension Pneumothorax	197
	Hemothorax	201
	Open Pneumothorax	203
	Flail Chest	206
	Additional Thoracic Injuries	208
	Considerations for Special Populations	210
Chapter 14	Abdominal Trauma	213
	Diaphragmatic Injuries	213
	Stomach Injuries	215
	Liver Injuries	217
	Spleen Injuries	220
	Pancreatic Injuries	222
	Large and Small Bowel Injuries	224
	Considerations for Special Populations	226

Chapter 15	Musculoskeletal and Soft-Tissue Trauma	229
	Extremity Fractures	229
	Pelvic and Femur Fractures	232
	Dislocations and Fracture-Dislocations	235
	Traumatic Amputation.....	238
	Crush Injuries and Crush Syndrome.....	241
	Soft-Tissue Injuries.....	244
	Complications	248
	Considerations for Special Populations.....	249
Chapter 16	Burns 253	
	Assessment Principles Specific to Burn Injuries	253
	Physiologic Response to Burn Injuries.....	255
	Intervention Principles Specific to Burn Injuries.....	258
	Transport Principles Specific to Burn Injuries	260
	Evaluation Principles Specific to Burn Injuries.....	262
	Thermal Burns.....	263
	Electrical Burns.....	266
	Chemical Burns.....	268
	Radiation Burns	271
	Considerations for Special Populations.....	273
Chapter 17	Maxillofacial, Neck, and Eye Trauma	277
	Maxillofacial Soft-Tissue Injuries	277
	Mandibular Fractures	281
	Nasal Fractures.....	283
	Maxillary Fractures.....	286
	Zygomatic Fractures	289
	Anterior Neck Trauma	292
	Eye Trauma	295
	Considerations for Special Populations.....	299
Chapter 18	Cardiovascular Emergencies	301
	Acute Coronary Syndromes	301
	Acute Myocardial Infarction	303
	Cardiac Contractility Failure.....	306
	Cardiac Dysrhythmias.....	308
	Hypertensive Emergencies.....	311
	Patients Requiring Cardiac Pacing	313
	Aneurysms.....	315
	Myocardial Contusion.....	317
	Aortic Dissection or Tear	319
	Pericardial Tamponade	321
	Vascular Injury.....	323

Chapter 19	Neurologic Emergencies	327
	Acute Alterations in Mental Status	327
	Increased Intracranial Pressure	331
	Meningitis	335
	Myasthenic Crisis	338
	Seizures and Status Epilepticus	341
	Stroke	344
	Considerations for Special Populations	347
Chapter 20	Respiratory Emergencies	351
	Acute Respiratory Failure	351
	Acute Respiratory Distress Syndrome	355
	Chronic Obstructive Pulmonary Disease	359
	Status Asthmaticus	363
	Pulmonary Embolism	366
	Acute Pneumonia	370
	Spontaneous Pneumothorax	373
	Medications for Respiratory Emergencies	376
	Considerations for Special Populations	379
Chapter 21	Abdominal Emergencies	383
	Acute Gastrointestinal Hemorrhage	383
	Acute Pancreatitis	386
	Liver Disorders	388
	Abdominal Compartment Syndrome	390
	Considerations for Special Populations	393
Chapter 22	Metabolic and Endocrine Emergencies	397
	Dehydration	397
	Electrolyte Abnormalities	399
	Syndrome of Inappropriate Antidiuretic Hormone	403
	Diabetes Insipidus	405
	Hypoglycemia	407
	Diabetic Ketoacidosis	409
	Hyperglycemic Hyperosmolar State	411
	Addisonian Crisis	413
	Thyroid Storm	415
	Myxedema Coma	417
	Hypoparathyroidism	419
	Considerations for Special Populations	421

Chapter 23	Infectious and Communicable Diseases	423
	Infection Control in the Transport Environment.....	423
	Sepsis.....	427
	Tuberculosis.....	428
	Methicillin-resistant Staphylococcus Aureus.....	429
	Hepatitis.....	429
	Meningitis.....	430
	Influenza.....	430
	Middle East Respiratory Syndrome.....	431
	Human Immunodeficiency Virus.....	432
	Viral Hemorrhagic Fevers.....	433
	Considerations for Special Populations.....	434
Chapter 24	Shock	437
	Pathophysiology of Shock.....	437
	Assessment Principles Specific to Shock.....	438
	Intervention Principles Specific to Shock.....	439
	Hypovolemic Shock.....	441
	Cardiogenic Shock.....	443
	Neurogenic Shock.....	445
	Septic Shock.....	447
	Obstructive Shock.....	448
	Anaphylactic Shock.....	449
	Considerations for Special Populations.....	450
Chapter 25	Environmental and Toxicologic Emergencies	455
	Decontamination.....	456
	Assessment Principles Specific to Environmental and Toxicologic Emergencies.....	459
	Intervention Principles Specific to Environmental and Toxicologic Emergencies.....	460
	Over-the-Counter Medications.....	461
	Prescribed Medications.....	464
	Illicit Substances.....	470
	Chemicals and Poisons.....	474
	Envenomation.....	479
	Bites.....	484
	Heat-related Emergencies.....	485
	Cold-related Emergencies.....	488
	Submersion Emergencies.....	491
	Considerations for Special Populations.....	492

Chapter 26	Obstetric Transport	495
	Assessment Principles Specific to Obstetrics	495
	Preterm Labor and Premature Membrane Rupture	498
	Hypertension in Pregnancy	502
	Placenta Previa and Abruption Placentae	506
	Emergency Delivery	510
Chapter 27	Pediatric Transport	515
	Growth and Development in Children	515
	Approach to Pediatric Patient Assessment	516
	Airway	518
	Breathing	521
	Circulation	523
	Neurologic Status	524
	Exposure	525
	Pediatric Airway Obstruction	526
	Cardiac Conditions and Dysrhythmias	531
	Shock	533
	Pediatric Trauma	534
	Neurologic Emergencies	538
	Metabolic Emergencies	540
	Children with Special Health Care Needs	541
Chapter 28	Neonatal Transport	543
	Approach to Neonatal Transport	544
	Neonatal Assessment	546
	Respiratory Conditions	550
	Cardiac Conditions and Dysrhythmias	553
	Neurologic Conditions	555
	Gastrointestinal and Genitourinary Conditions	556
	Other Neonatal Presentations	559
	Index	563
