

The Association of
Technology,
Management, and
Applied Engineering

ATMAE Career Builder

Welcome! This is a new “one stop” newsletter that ATMAE is sending only to its student members. It is our hope to provide you here with all the information that is most important to students – and hopefully reduce the numbers of emails you get from us overall. ATMAE is going through significant changes. One of the biggest changes is our commitment to increase value to you as students. Maybe you saw our recent student survey (and filled it out for a chance to win a pair of Beats Headphones). In that survey we learned that most of you joined ATMAE because you are interested in expanding potential job opportunities in industry.

Leverage Association Membership to Maximize Career Potential

There is a reason that more and more employers are turning to associations to fulfill their hiring needs. Hiring managers want access to candidates that are truly invested in their career with above average skills and capabilities – and that’s what ATMAE’s job board provides. With so many employers looking to niche job boards, association members now have more control over their career destiny than ever before.

ATMAE Re-energizing Student Chapters!

ATMAE wants to create more value for our student members. One of the first steps in this process is re-energizing student chapters across the country. ATMAE encourages the formation of Student Chapters as a means to create opportunities for emerging professionals to get involved, network and learn about the most recent developments in the field of technology and applied engineering.
