Cultural Diversity Committee Newsletter
Volume 5, Issue 3 • December 2020

Cultural Diversity Committee Updates

Welcome to the third issue of the Cultural Diversity Committee Newsletter! This newsletter features the cultural diversity in autism research award recipient, announcements about upcoming RFAs, most recent research articles on the topics of cultural diversity in autism spectrum disorder (ASD), and resources.

In August, our committee hosted a webinar titled “Building Capacity to Increase Cultural Diversity in Autism Research: Insights from the INSAR Summer Research Internship in Autism and Cultural Diversity”. This webinar showcased the experiences of the 2019 summer interns and their faculty mentors as part of the INSAR Summer Research Internship in Autism and Cultural Diversity program. The recording of the webinar is available here.

If you would like to be featured or would like to nominate someone to be featured in the Spotlight section of our newsletter, have any upcoming publications, or know of any resources that are related to cultural diversity and autism, let us know! Contact email: culturaldiversitycommittee@autism-Insar.org
Dr. Waganesh Zeleke, a licensed, bilingual clinical mental health counselor and certified National counsel, is an Associate Professor in the department of Counseling, Psychology and Special Education at Duquesne University. Her research is in the area of identifying, understanding and treating mental health disorders in individuals who are from impoverished communities, where school and community services can be uninformed about the needs of diverse groups. Dr. Zeleke’s work has a particular focuses on advancing the needs of children with autism and the importance of understanding multicultural experiences. Her research results in recommendations that are relevant for policy makers addressing the needs of children with autism in the US and in Ethiopia. Dr. Zeleke’s work also explores the epidemiology, diagnosis, and treatment of autism in Ethiopia and Zimbabwe and has started to right the imbalance of knowledge about autism worldwide.

Dr. Zeleke’s work has been embraced by the local community. Not only has she helped with service provision at Joy Center for Children with Autism, one of the pioneer organizations in Ethiopia opening in 2002, they have also served as a community partner. The Joy Center has been instrumental in designing outreach initiatives for families to determine how to best reach individuals with ASD – which included a television information campaign aimed at reducing stereotypes. Additionally, Dr. Zeleke provided educational workshops partnering with two autism centers to ensure parents and service providers’ voices are being represented in prioritizing the needs of their community. Her research and professional insight have been featured in the newsletter the Spectrum.

A critical component of Dr. Zeleke research agenda focuses on children with Autism in the low-resource areas of the world. Given that minority children with Autism are disproportionately represented in health care access and utilization, Dr. Zeleke analyzed a large national dataset of children with ASDs and other developmental disorders. Her focus on disparity research emphasizes detecting, understanding, and reducing the level of disparity in mental healthcare access and utilization of children with ASD from minority background.

Dr. Zeleke's track record is extensive as it includes 28 peer-reviewed publications, five book chapters, and more than 50 peer-reviewed national and international presentations as well as several grants. All her work address the needs of disenfranchised groups including children with disabilities (especially, autism), immigrant families in the US and African families in Ethiopia. Samples of Dr. Zeleke’s publications include (a) Disparities in Diagnosis and Service Access for Minority Children with Autism Spectrum Disorder; (b) Healthcare and Educational Services Used by Children with Autism Spectrum Disorders in Poverty; c) The Path to an Autism Spectrum Disorders Diagnosis in Ethiopia: Parent Perspective; (d) Autism service providers report: Behavioral and educational interventions used in Ethiopia; (e) Children with Autism in Ethiopia: Diagnosis, legal, and educational services and (f) The experiences of Zimbabwean children with Autism and their families in terms of the process of diagnosis and access to services: Parents’ views, (g) Assessing the effectiveness of professional development training on Autism and culturally responsive practice in Educators and practitioners in Ethiopia, and (h) Examining the effectiveness of Behavioral Treatment and Intervention Received by children with Autism.
INSAR Cultural Diversity Research Award

Call for nominations: *Early January, 2021*

Nominations due date: *Early February, 2021*

The Cultural Diversity Research Award seeks to support and recognize research with significant impact on culturally diverse and underserved communities. The goal of the award is to support investigators who conduct community-based or community partnered research that seeks to leave a lasting impact on underserved and under-researched communities beyond the scope of a single research study. For more information, visit this [link](#).

INSAR Research Internship in Autism and Cultural Diversity

Call for applications: *Early December, 2020*

Application due date: *Late January, 2021*

In recognition of the increased need for the field of autism to incorporate global perspectives and issues of cultural diversity in scientific research, the INSAR Cultural Diversity Committee invites research proposals from highly qualified undergraduate and graduate students interested in cultural diversity issues relevant to autism spectrum disorder (ASD). For more information, visit this [link](#).
