Subject: Arizona Medical Association Request

Dear Mayor INSERT,

As the largest physician-led organization in our state, I am writing on behalf of the Arizona Medical Association (ArMA) to offer our support, guidance, and resources as you contemplate how to address COVID-19 preventive measures in INSERT CITY.

ArMA supports the actions that Governor Ducey announced yesterday, including empowering local officials to implement measures that will prevent spread of this virus. Just as there are subtle differences in how physicians treat each patient, the same is currently true with the different areas of Arizona, and our cities must have the flexibility to adapt as conditions change.

We would welcome an opportunity to work directly with you and your team to address the rising cases of COVID-19. As the collective voice of physicians throughout our state, we believe we can provide guidance that is backed by science and data, while amplifying the message you want to communicate. Please let me know if you are open to a meeting to discuss in more detail.

Thank you in advance for your consideration.
