TARGET AUDIENCE

This course is designed for physicians and surgeons, mid-Level health care providers, otolaryngology residents, and Speech Language Pathologists, as well as graduate students in the SLP audience. Specialties include: Otorhinolaryngology, internal medicine, speech-language pathology, pulmonary, integrative medicine, radiation oncology and medical oncology.

LEARNING OBJECTIVES

Upon conclusion of this program, participants should be able to: (General Session)

• Identify and treat functional disorders of the larynx that account for frequently misdiagnosed etiologies of voice and swallowing disorders.
• Manage Head and Neck Cancer-related swallowing disorders that can be immediately implemented into practice.
• Explain various pediatric voice disorders and treatment options.
• Identify the differences in diagnostic characteristics among muscle tension dysphonia, vocal tremor, and spasmodic dysphonia, for optimal treatment.
• Describe variables in treatment of muscle tension dysphonia in singers.

Following attendance at this workshop, participants should be able to: (Workshops)

1. Advanced Laryngectomy Rehabilitation; TEP Management
   – Assess voice prostheses in a laryngectomee and evaluate methods for sizing and techniques for placement.
   – Determine the proper heat and moisture exchange system for laryngectomees and instruct the patient on placement and management.
2. Affordable Choices for Voices and What Therapy Tools Work for What?
   – Perform low-cost, yet comprehensive, acoustic and aerodynamic voice assessment.
3. Office-Based Laryngology Procedures: Hands-on Lab
   – Evaluate optimal techniques for performing a variety of office-based procedures.
   – Identify methods and tools used to perform office-based procedures.
   – Assess when to use of an office-based procedure vs. surgery.
