

REDESIGNED AWPCA.ORG

By Gopal Raju, Principal, Oz Engineering and Chairman of the AWPCA Information Technology Committee

AWPCA's newly redesigned Web site (www.awpca.org) was launched November 1 and is receiving rave reviews from members and nonmember users. The new design gives the site a totally new look and feel. A number of improvements have been implemented making it user-friendly and also easy to access information. The site layout is designed using drop down menus to provide the maximum amount of viewable area for the content.

We plan to add more features to the site such as advertising opportunities, online membership, event registration, discussion forums, bookstore, and a members-only area.

Currently only Pretreatment and Water For People committees have separate web areas. As content for the other committees becomes available we will create separate areas for each of the committees.

We would welcome any comments or suggestions about how to improve this site. Please let us know if there is anything you would like to see added or improved. You can access the feedback form for our web site by following the comments page link on the home page.

I would like to thank Jim Pembroke and Frank Tantone for their leadership, and Debbie Muse for her support in working with the IT Committee and making this a positive experience in creating the site.
