TOUR

Join the AZ Water Construction Committee for a tour of the Salt River Fields Water Production Facility

As you are driving north or south on the 101 past Salt River Fields (Diamondbacks Spring Training Facility) you might be wondering what is going on in this area. There seems to be a large amount of construction concentrated around Salt River Fields. You might have also noticed DPP MGC banners on the fencing surrounding the construction. DPP MGC is a partnership with a member of the Community and together they are building SRP-MIC's third water production facility. MGC began constructing the first of these facilities in 2005 at Talking Stick Resort. This tour will provide attendees information on production wells, arsenic treatment, post-tension buried reservoirs, and booster pump stations.
