### VirtualPaint Simulator

VirtualPaint will be available for demonstration and use on the day of the seminar compliments of the Sherwin-Williams Company. VirtualPaint was developed by the University of Northern Iowa's Iowa Waste Reduction Center; the award-winning VirtualPaint is a highly adaptable virtual reality training simulator that mimics a fully customized painting and coating production environment.

- Take hands-on training out of the spray booth and into the classroom
- Customize coatings, parts and equipment to replicate day-to-day operations
- Track data in real time to quantify painter skills
- Allows for continual practice and immediate feedback
- Completely eliminates hazardous air emissions and waste
- Significantly reduces the proper spray application learning curve
- Benefits experienced and novice painters
- Unlimited practice parts and coating at the touch of a button
- Use for hiring skill assessments and re-training evaluations
