What is the IABA Scholarship?

The IABA Scholarship Program seeks to provide scholarships at the undergraduate or graduate level for Black students who are interested in pursuing actuarial careers.

Why Apply for the Scholarship?

IABA has awarded over $1,285,000 in scholarships since 1992. Scholarships are awarded on basis of merit and can be renewed.

In 2021, IABA awarded $250,000 in scholarship to 72 graduating high school seniors, undergraduate and graduate students. Fifteen scholarships included internship or entry-level interview opportunities.

Receiving the IABA Scholarship has been statistically proven to lead to an increase in the number of Actuarial exams passed, as well as the likelihood of securing a job or internship.

Scholarships also include IABA Annual Meeting attendance (including travel stipend and hotel); exclusive interview and networking opportunities and assignment of an IABA mentor.

Program Stats

- Over $1,285,000 awarded since 1992
- $250,000 awarded to 72 students in 2021

Scholarship Eligibility:

- Identify as Black;
