

Prof Andrew Scarsbrook

St James's University Hospital, Leeds

Talk title: AI in Nuclear Medicine – hype or hope?

Professor Andy Scarsbrook is a dual-certified Consultant in Radiology and Nuclear Medicine at St. James's Institute of Oncology in Leeds. He is also a Professor of Radiology at the University of Leeds. Prof Scarsbrook received his specialist training in Clinical Radiology in Oxford. Subsequently he undertook a fellowship in Nuclear Medicine and PET-CT in Oxford and at St. Thomas's Hospital in London. He has been a Consultant in Leeds since October 2006 at one of the largest imaging departments in the UK.

He is academically active and major research interests include functional and molecular imaging in oncology and the use of artificial intelligence (AI) in medical imaging. Prof Scarsbrook has published extensively and lectured at national and international meetings on many aspects of imaging. He is an active member of the National Consortium for Intelligent Medical Imaging (NCIMI) AI Centre of Excellence.
