

Prof Franklin Aigbirhio

University of Cambridge

Talk Title: The UK PET Network

Franklin Aigbirhio obtained a BSc(Hons) in chemistry from the University of East Anglia (UK) followed by a DPhil from the University Sussex (UK). He entered the research field of radiochemistry and biomedical imaging on joining the MRC Cyclotron Unit at Imperial College London in 1991. He then joined the Wolfson Brain Imaging Centre (WBIC), University of Cambridge in 1997 as a founding staff member, helping to establish its PET programmes and progressed to Co-Director of the centre in 2016. Presently as Professor of Molecular Imaging Chemistry he manages a lab undertaking research programmes in developing novel PET imaging probes and methods and their application to preclinical and clinical research in neuroscience. He is a Senior Research Fellow at Magdalene College Cambridge and a Director of the International Society of Radiopharmaceutical Sciences
