Bayer Symposium

Tuesday 17th May

8.15 – 8.55

Optimal treatment in metastatic castration-resistant prostate cancer: Real-world cases

This Bayer-sponsored symposium will explore the value of alpha-particle-emitting radioisotope treatment for metastatic castration-resistant prostate cancer through interactive and collaborative discussions. Join us to hear leading interdisciplinary experts provide valuable insight from their clinical practice and real-world experience. This is a Bayer promotional meeting, Bayer products will be mentioned.

Speakers:

- Professor Francis Sundram, Consultant in Nuclear Medicine, University Hospital Southampton NHS Foundation Trust
- Professor Amit Bahl, Consultant Clinical Oncologist, Bristol University Hospitals NHS Foundation Trust

Agenda:

- Welcome and introduction - Dr Francis Sundram
- The current mCRPC treatment landscape (presentation) – Dr Francis Sundram
- Managing patients with mCRPC: perspectives from the oncologist and nuclear medicine physician (interview-style discussion) – Dr Francis Sundram and Prof Amit Bahl
- Treating patients with mCRPC: A case-based discussion (interactive presentation) – Prof Amit Bahl
- Live Q&A session
