Prof Val Lewington

King's College London

Talk Title: Annual Lecture - Molecular Radiotherapy: Thinking allowed

Val Lewington qualified in general medicine before training in nuclear medicine in Southampton and at the University of London. Developing a special interest in cancer imaging and treatment, she has been at the forefront of nuclear medicine therapy expansion in the UK, particularly in the fields of thyroid disease, neuroendocrine tumours and prostate cancer.

Appointed Professor of Clinical Therapeutic Nuclear Medicine at King’s College London in 2011 she was Programme Director for the UK training course in Nuclear Medicine from 2011-21 and inaugural Chair of the European School of Molecular Imaging and Therapy 2016-18. She is a recognised international leader in molecular radiotherapy and committed to research linking new diagnostic nuclear medicine imaging techniques directly to targeted treatment.
