COMMUNICATION REGARDING NTP RESUMPTION OF Mo-99 AND I-131 PRODUCTION

Brussels, 28 May 2019

NTP provided the following information to AIPES concerning the current status of its Mo-99 and I-131 production activities:

NTP received approval from the National Nuclear Regulator of South Africa to resume Mo-99 production operations with immediate effect. NTP will be operating at 40% of capacity until permission is granted to also restart a second production line. It is estimated that full capacity will be restored in early July 2019.

Bernard Ponsard,
Chairman ERT

Ira Goldman,
Chairman AIPES SoS WG
