

Course Information

BOMI Energy Management and Controls class

This BOMI International course is required for both the SMT® and SMA® designation programs. Applies to SMC and BEC Certificates.

This course teaches you to develop energy management strategies for HVAC, electrical, and lighting systems. You will learn about the components, principles, adjustment, and maintenance of system controllers, auxiliary devices and electronic, pneumatic, and computer control systems. We'll cover heating, cooling, and humidification control applications, along with variable air volume and building pressurization control devices. You'll develop the skills and knowledge to perform a cost/benefit analysis of HVAC, electrical, and lighting systems, and to create an energy management program for your facility.
