

**Energy Profiles Limited**

Adrien Deveau
Principal and Vice President, Energy Profiles Limited (EPL)

EPL is a property technology and energy engineering firm focused on improving building performance and managing sustainability data in property portfolios across North America. EPL is a pioneer in web and cloud-based analytics and data management, providing custom Energy and Sustainability Data management for an aggregate commercial portfolio in excess of 7,000 properties and \$1 billion in annual utility costs. EPL's Building Intelligence® is a data-driven platform of custom analytics tools that drive standout performance at properties across the continent, leading to millions of dollars in utility cost reductions while helping buildings perform better.

Adrien has been providing services to building managers, developers and designers for over 20 years. Prior to joining EPL, Adrien led, managed and was pivotal in building Halsall's industry leading Green Building team. Adrien is active in the real estate industry, as a BOMA and NAIOP member and currently serving on the BOMA Canada Board of Directors. He is a previous Board member with both BOMA Toronto and NAIOP Toronto. He is a past chair of the NAIOP Toronto Sustainability Committee and has served on Greening Greater Toronto's Race2Reduce Working Group, as a judge for the NAIOP REX Green Award, and on the evaluation committee for the CaGBC National Conference Presentations.
