

**Mikele Brack****Founder Urban Living Futures Inc., Creator, UPPLift Pilot Program, Smart Cities expert, Innovator**

Mikele is the founder of Urban Living Futures Inc. and creator of the UPPLift Urban Pilot Platform, matching smart city innovators with technical and business resources and opportunities to deploy their solutions and gain proof of concept with global cities and asset owners/managers. She is also an advisor and mentor to smart city start-ups, and an industry expert assessor for SME funding.

Previously, Mikele led the Cities sector in General Electric's Global Growth & Operations team, developing commercial models for sustainable energy solutions for cities and urban developments. Prior to joining GE, Mikele led the UK introduction of Building Information Modelling services, promoting collaboration and efficiency in design, construction and lifecycle building portfolio management.

Earlier in her career, as an urban planner, Mikele worked on property and infrastructure masterplans, sustainable development studies and socio-economic impact assessments for new urban areas, regeneration areas and urban infrastructure systems in Asia, Europe and North America.
