

CLIENT EXCHANGE: INCREASED PROJECT VISIBILITY

Tuesday 11th November 2025,
Coventry

British Water's third annual conference will feature a separate Client Exchange event, where supply chain companies will engage directly with expert water clients – water companies, consultants, and contractors – to gain insights into their current priorities and future needs.

Each discussion table will be hosted by either:

- one contractor and one consultant, or
- one water company

Supply chain participants will rotate between tables five times throughout the day. Each 40-minute session will include a short presentation from the table host(s), followed by an open Q&A to encourage discussion and knowledge exchange. Table hosts will outline how the supply chain can engage with their organisation, upcoming work pipelines, and explore key areas for potential partnerships.
