California Fire Chiefs Association
IROC to IQS Transition Webinar

Introductions (*Cal Chiefs President Molloy*)
- Welcome stakeholders from Cal OES and the transition teams.
- Define objective: Supporting the California fire service in completing the transition of IROC into IQS
- Introduce Speakers:

Strategic Necessity (*Chief Cox – Cal OES*)
- The "Why": Enhancing statewide emergency response capabilities and overhead qualification management.
- Current integration status and deadlines for the remaining departments.

The Technical Framework *(Mike Amado, IT Program Administrator - City of Murrieta)*
- IT Infrastructure: Reviewing server requirements and system architecture for IQS.
- Data integrity and migration strategy based on the Murrieta Fire & Rescue implementation.

Operational Workflow & Execution (*Training Captain Matt Corelli - Murrieta Fire & Rescue*)
- Data Entry: Best practices for transitioning personnel records and managing certifications in real-time.
- Ensuring seamless integration with resource ordering processes.
- Importing of IROC and IRWIN assignment records into IQS

Expert Technical Support & FAQ (*Captain Alex Entenman, Kern County Fire*)
- Suggestions for Operational Area IQS management
- Integration Expertise: Providing specific technical guidance on account setup and collective system agreements.
- Live Q&A Session: Establishing a protocol for handling specific technical questions during the webinar.
