As we round the final turn on my tenure as CCAI president, I want to take this opportunity to thank everyone for their enthusiasm in support of the growth and development of this association. CCAI members are clearly passionate about what they do for the finishing industry. The CCAI Board of Directors, Corporate and Custom Coater members, along with active chapter members and staff continue to maximize membership potential, and have us all recognize how much we can learn from our finishing community of experts. We need to continue on this path as the future of the finishing industry warrants our attention.

We have experienced a LOT of growth and change during my two years as president including our participation in the FABTECH Expo and Conference, the addition of new CCAI chapters, the editing and re-writing of the technical manuals which have been selling more than ever. But one thing remains constant, the mission of the Chemical Coaters Association International -- to continue to provide outstanding educational and networking opportunities to the entire industrial finishing community.

As my final message to you, I challenge each of you to get involved with CCAI on some level and help us continue to grow. I encourage you to join us at our annual meeting being held in Ft. Lauderdale, FL from June 23-26. This meeting is always a catalyst for great ideas! Check the website, www.ccaiweb.com for more details.

Finally, there will be a new CCAI President installed at our annual meeting. Sam Woehler of George Koch Sons, LLC will assume the responsibilities and provide leadership to this great association. I’m sure he will find the role as challenging and satisfying as I have. I look forward to continued success for CCAI!

Sherrill Stoenner
National President, CCAI

Let’s Keep Growing!
Where Do We Go From Here: Building a Better Finishing Industry

Anne Goyer, CCAI Executive Director

Over the past two years, CCAI has seen a tremendous amount of activity. We’ve launched new chapters, we joined FABTECH as a partner to bring finishing to one of the largest shows in North America and our FINISHING Pavilion is now one of the largest FINISHING show in North America, we have re-written (and are still in the process of doing so) our popular training manuals, we’ve seen our membership steadily grow through tough times, and we are launching a statistics program.

But that’s not enough. We can and need to do more. We need to work together to build a “better finishing industry” for our members, for their companies and for the long-term health of American manufacturing. We need to do more to encourage young talent to think of our industry as a place where they can develop a rewarding career.

A recent CCAI Salary and Demographics survey of our members tells us that people make a good living as a part of our industry. But are we spreading that word? Are we talking to our kids about careers in finishing and manufacturing? Are high schools and colleges aware that careers in finishing even exist?

In doing research for a presentation at the Minnesota Paint & Powder Expo, I’ve quickly learned our workforce is aging (I think we already knew that) and we do not have enough skilled people to take their place as they are getting ready to retire. The lack of skilled labor is something we need to face and address now. The education and training our members get through CCAI is so important but I’m afraid that’s not enough. We need to “step it up” and develop programs that train and educate the next generation of finishing professionals. And we need to do it together, starting now.

CCAII is working to develop promotion and programs that will drive awareness that there are many viable career options in the finishing world. We may call on you to tell us about your experiences in finishing. We may ask for your advice that we can share with students who are searching for a career path.

In the coming months, if someone from CCAI asks you for information that will help us build a better finishing industry, we ask that you take some time to participate. We won’t ask for much time, there is no financial investment involved.

Thanks to everyone who recently responded to the CCAI Demographic and Salary Survey. Thirty percent of our membership responded giving us some great data to lay the foundation of our Building a Better Finishing Industry initiative. You’ll be hearing a lot about this in the coming year. At our upcoming CCAI Annual Meeting this June, I’ll be presenting the results of our recent survey together with other initiatives that we can combine with our own to help create the skilled labor force manufacturing needs to continue to produce high quality finished products.

From your entire CCAI Board of Directors and Staff, we sincerely thank you for your support and efforts to help CCAI continue to deliver the education and training our industry needs. We can’t do it without you. I look forward to seeing many of you in Ft. Lauderdale for our Annual Meeting from June 23 – 26. If you haven’t been to a CCAI Annual Meeting, this would be perfect one to attend!

RENEW ONLINE…www.ccaiweb.com
OR click the QR Code here to access the renewal form!
Year after year, CCAI members who attend our Annual Meeting tell us things like this:

“Best annual meeting programming yet. Great mix of technical and business information.”

“Keep up the excellent work. Great job!”

“Thanks for making these meetings a very valuable use of my time and extremely enjoyable as well.”

“CCAI does an excellent job every year and this meeting was definitely the best.”

“Thanks again to everyone involved. It was a GREAT experience!”

“**This is a first class event, well worth the value.**”

Those are real comments from our Annual Meeting evaluation reports for the past two years. It’s a tall order to continue finding the right mix of topics and speakers that keep our members telling us that CCAI’s Annual Meeting is second to none. But we’re doing our best to once again offer timely, valuable presentations that help members professionally and personally.

As our 2012 Annual Meeting program has come together, we believe we will deliver quality content with networking opportunities that will have members happy that they attended the meeting. Our host hotel, B Ocean on Ft. Lauderdale Beach, promises to be another great venue for us from June 23 -26, 2012.

But that’s not all! There will be plenty of time to network with members and enjoy the Ft. Lauderdale area. We’ll start with our Welcome Reception sponsored by Products Finishing high atop B Ocean with ocean views that don’t end. We’ll have our traditional golf outing and annual awards luncheon. You’ll enjoy a professionally run sand castle building competition with refreshments and time to enjoy beautiful Ft. Lauderdale beach.

On-line registration will be live by April 2, 2012. But don’t wait until then to book your airfare. Flights can be booked now. Be sure to check fares into both Ft. Lauderdale and Miami for the best rates.

We look forward to welcoming everyone to CCAI’s 2012 Annual Meeting to help us start Building a Better Finishing Industry!

Don’t forget...CCAI’s Annual Meeting is the most cost effective meeting you can attend that delivers the BEST information for our members. At under $400 for a member and spouse/guest combined, there is no other meeting that matches our Annual Meeting.
CCAI’s FINISHING Pavilion at FABTECH Expected to be Largest Yet

While FABTECH isn’t until November 12 - 14, much of the planning is well underway. With a show floor that will feature more than 1,000 exhibitors and a conference program that will offer more than 100 technical sessions, planning never really stops. For CCAI, the presence of finishing on the show floor is becoming more prominent with each FABTECH show. 2012 is shaping up to be our largest FINISHING Pavilion to date.

CCAI’s FINISHING Pavilion is closing in on 20,000 net square feet of exhibit space sold and it’s only March. We anticipate that we will sell out our floor space by the time CCAI’s Annual Meeting rolls around in June. What’s even more exciting is that many of our exhibitors have increased their booth space significantly, allowing them to bring and demonstrate more equipment and products than in the past. CCAI’s FINISHING Pavilion is fast becoming “the destination” for the entire finishing industry to find and experience at new technologies, compare products and services and take advantage of the vast array of educational opportunities available.

Conference programming for CCAI’s FINISHING Conference is currently in development, promising to deliver timely and important educational information for all finishers, as always!

For anyone concerned about attendance at FABTECH 2012, the last time FABTECH was in Las Vegas, (in 2008) it drew more than 22,000 attendees, nearly half from east of the Mississippi. This year’s FABTECH in Las Vegas is expected to draw more than 25,000 attendees. During a recent FABTECH Exhibitor Council meeting, FABTECH exhibitor Nick Ostrowski, General Manager of Amada America, one of the largest exhibitors in the show, told the Council that business on the West Coast is the strongest they’ve seen in years. Combined with the strong draw of attendees from the Midwest, East Coast and Southeast, Mr. Ostrowski said he is confident that FABTECH 2012 in Las Vegas will be a fantastic show.

If you haven’t had a chance to check out CCAI’s FINISHING Pavilion and list of exhibitors lately, go to www.ccaiweb.com and click on the FABTECH logo. You can bring up the current floor plan and list of exhibitors.

Start planning now! Check airfares and book your flights when you find a reasonable fare.

CCAII has designated Treasure Island as its headquarters hotel. Room rates are very reasonable - $105 from Sunday, Nov. 11 through Thursday, Nov. 15 and $145 the weekend before the show. Go to www.fabtechexpo.com and click on HOTEL AND TRAVEL to book now. FABTECH will provide shuttle bus service from Treasure Island to the Las Vegas Convention Center on show days.

We look forward to seeing many of you in Las Vegas this November!
ABQ Manufacturing
4919 Paseo del Norte NE, Albuquerque, NM 87113
505-338-2400 • www.abqmfg.com
ABQ Manufacturing has been providing powder coating services to over 500 unique customers in aerospace, architectural, military, medical, electronic, civic, food processing, commercial and artistic industries and fields since 1996. They believe that if they provide a high quality product, delivered on time, at a competitive price, customers will seek them out. They continue to adhere to that philosophy.

ABQ Manufacturing has been offering Precision Masking since 1996. Having applied powder coating to thousands of parts that require masking, their experienced team has perfected the process, becoming experts at it. Visit www.abqmfg.com for a complete list of products and services.

PEM, Inc.
320 Mallard Ln.
Mankato, MN 56001
888-969-1601
www.spraywand.com
Pretreatment Equipment Manufacturers, Inc. has been exhibiting with CCAI finishing shows for several years. After the FABTECH 2011 show in Chicago, the benefits of becoming a corporate member were clearer than ever.

President, John Kapsner decided to become a corporate member of CCAI because of the strong business networking and target marketing CCAI can provide for them.

Spray Wand Pretreatment Application System P300 (photo on right) is designed for OEM’s and job shops that have an ongoing need for the cleaning and pretreating of metals. It reduces labor and chemical costs, improves paint adhesion and corrosion protection.

Magic Rack
2490 McGraw Rd. E.,
Columbus, OH 43207
614-492-8811 • www.magicrack.com
Magic Rack® designs and manufactures industrial hanging paint racks and paint hooks for powder coating, e-coating, liquid spray, flow coat, fluidized bed and plating processes. Based on unique patented Magic Rack® technology, their racking systems are designed and built to accommodate the individual size, shape and weight of your specific parts. Even the trickiest product finishing challenge can be solved with Magic Rack’s versatile Magic Rack® technology.

Tammy Davitz stated that Magic Rack became a CCAI Corporate Member because they believe the association makes a difference in the industry by providing information, education and events that are important and relevant to corporations. They also feel the exposure provided by CCAI is valuable to their business.

New Custom Coater Member

Binks, DeVilbiss, Ransburg, BGK have come together under one roof to provide a full range of innovative liquid finishing solutions. Together, they offer a wide variety of manual and automatic spray guns, material handling pumps, pressure tanks, and paint circulating systems. They are an industry leader in design and manufacture of electrostatic systems and related electric fluid handling equipment. Their infrared curing systems incorporate a full range of coatings utilizing chain on edge conveyors, advanced automated finishing systems and reciprocating machines. They have been an industry leader for over 100 years. Please visit us at www.binks.com www.devilbiss.com www.ransburg.com www.bgk.com

New Corporate Members

Calvary Industries
9233 Seward Road
Fairfield, Ohio 45014
(513) 874-1113
www.calvaryindustries.com
Calvary Industries, Inc. is a custom formulator and manufacturer of metal pretreatments, coatings, cleaners, rust inhibitors, paint strippers, water treatment, and other specialty chemistries. They service all of their customers with a direct sales force and laboratory services such as physical testing and chemical analysis. Calvary Industries is ISO 9000 and TS 16949 certified.

Chris Berger says, “Calvary became a corporate member because we really wanted to be more involved in CCAI. We plan to start attending regular meetings and would like the opportunity to present at meetings. We also like the many opportunities provided by CCAI to network with other members.”
It takes less space. It runs on less energy. It’s low-maintenance, and it offers flexibility that is changing the way things are made. An ability to innovate in hard times can help bring back good times, and Kasa is among several of Salina’s longtime industries that have survived and thrived because of their ability to respond to a changing market.

Kasa created IntelliFinishing, a modular industrial painting system. They are facing the challenge of introducing change to a manufacturing process that has stayed essentially the same for 40 years, said Doug Oliphant, vice president of IntelliFinishing. “The more installs we get, the more references and the more believers there are,” Oliphant said. “Success breeds success.”

IntelliFinishing is redefining business as usual for its parent corporation, and Oliphant said the timing for its launch may turn out to be “really good.” “Economic indicators are that things are coming back, and we’re ready to go,” he said. “Our company’s philosophy is that we always have to be growing. If you’re just steady, you’re dying.”

Chapter Happenings

CENTRAL STATES
Valspar Plant Tour
In February the CCAI Central States chapter took a guided plant tour at Valspar. They started the day with lunch before heading to the plant. The complete tour proceeded from raw material through mixing, to extruding and finally grinding and packaging. Valspar demonstrated many quality control steps they go through in order to produce an order for their customers. It was a great day of education and fun.

Central States chapter members enjoying their extensive plant tour at Valspar.

NORTHERN ILLINOIS
Pretreatment Symposium
The Northern Illinois Chapter hosted its second annual Pretreatment Symposium on February 16, 2012 in Waukegan, IL. Kevin Coursin of KMI Systems, Inc. moderated the event. A panel of five experts provided a comprehensive study of surface pretreatment in preparation of paint or powder coating. The following companies contributed speakers for the panel:

- Henkel Corporation, David George
- Galaxy Associates, David Chalk Ph. D
- Chemetall Americas, Gary Nelson
- Coral Chemical Company, Ken Kaluzny
- Americo Chemical Products, Inc., Jeff Studnicka

Discussions and case histories included a review of substrates and soils; the purpose of surface treatment; a summary of traditional surface pretreatment technologies; transitional surface treatment; quality control, coating evaluation and defect analysis and removal of laser and mill scale. There were over 45 people in attendance from the Illinois and Wisconsin area. All found the presentations to be relevant, interesting and informative.

(top) The Northern Illinois Pretreatment Symposium drew an attentive crowd.

(bottom) David Chalk, Ph.D., Galaxy Associates presents as part of the expert panel at the symposium.

TWIN CITIES
Visit the Twin Cities Chapter website for more photos and chapter information, www.ccatc.com.
Donaldson Plant Tour
Submitted by Pat Cullen
On Thursday, January 19th, the Donaldson Company plant in Baldwin, WI opened its doors to a group of 30 from the Twin Cities chapter for a very thorough plant tour of its manufacturing facility. Donaldson is a leading worldwide provider of filtration systems. The company started back in 1915 with Frank Donaldson and two others starting up a shop to manufacture air cleaners for farm tractors. Donaldson has since grown to a force of 42 plants throughout the world.

Donaldson Plant Manager Tom Carlson opened the session with a detailed description of the Donaldson Company history and plant operation in Baldwin, followed by Joe Hemenway, the Donaldson Quality Manager, who discussed how the paint & process functions are managed at the plant. The tour attendees were taken throughout the plant viewing both Donaldson lines of industrial and military products. Welding, fabrication parts cleaning and painting were the featured areas of the plant tour.

Tom Carlson and Joe Hemenway address the Twin Cities tour attendees.

WEST MICHIGAN
Heat Transfer International Plant Tour

Senior purchasing agent Kevin Ingersoll of HTI and West Michigan chapter member, Scott Bultman of Van Dyken Mechanical (Primary Mechanical Contractor for HTI) combined on the tour to show the group turbines, burners, testing lab with $1,000,000. worth of state of the art equipment, manufacturing facility, and R & D lab with a full functioning Bio Mass Gasification system.

HTI uses a Michigan first purchasing policy and several WM Chapter members have provided goods and services for this business. HTI is currently working on the engineering and approvals phase for a new BIO Mass Gasification system for Midland Power Station in Midland, Michigan.
