always look forward to the CCAI Annual Meeting as a time to connect with others and learn more about our finishing industry. This year was no exception. I definitely returned home more energized about the future of CCAI. This year’s meeting included several great speakers with topics ranging from communications, tips on improving our own productivity and eliminating stress, online security and the economy. We also had some great discussion on how our chapters can improve their own individual chapter events with ideas on programs and events. My personal favorite was listening to Conor Cunneen teach us the Gift of GAB (Goals, Attitudes & Behavior) using his Irish wit and humor. His message was well received by all.

It was exciting to learn that a new CCAI Chapter has been formed in Salt Lake City and the Southeast Michigan Chapter is becoming more active. In addition, several new Chapters are being discussed in other cities. The expansion of our grassroots is the basis of CCAI and it is nice to see all the new members. This is all very promising for the future. If you are not a member of a local chapter, please visit the CCAI website www.ccaiweb.com and find a chapter near you. It is a great way to learn new things and network with others in the finishing industry.

One of CCAI’s primary missions is education. As part of this, CCAI had set up a scholarship program to attract new talent to our industry. Three $1,500 scholarships were awarded to students studying science or engineering. This is a program that we every year and hope to be able to expand it. Read more about these students later in this newsletter.

CCAI has been also working on updating and expanding the Liquid Coatings for Industrial Finishing manual. We are hopeful to have this all completed by FABTECH in November. Thank you to all the volunteers who are busy working on this. It really requires a team effort to accomplish this work, but that is what being a CCAI member is all about – helping to improve the industry. If you haven’t been part of one of these teams, please consider joining us. It is very satisfying. We have several new projects on the horizon and are always looking for additional help. Speaking of involvement, CCAI awarded the James & David Wright Lifetime Achievement award to the late Robert New who retired from Broan Manufacturing and was a longtime leader of the Wisconsin Chapter. Those of us who knew Robert would agree that he was an inspiration to all and dedicated many hours to improving the lives of others through his work at CCAI. Congratulations to Robert and his family.

FABTECH 2015 is back in Chicago from November 9th -12th and is already our largest FINISHING Pavilion to date. The FINISHING Pavilion has just sold out but there is space available in Hall C if you want to be a part of it. I hope to see you all there.

Kevin Coursin,
CCAI National President
CCAI’s 2015 Annual Meeting Delivers

It was no surprise that the Seagate Resort in Delray Beach, Florida provided the picture-perfect venue for CCAI’s 2015 Annual Meeting. As has become the norm, CCAI delivered a series of excellent presentations, entertaining social events and relevant information for all attendees and guests.

With the traditional Welcome Reception sponsored by Products Finishing magazine, the Annual Golf Outing, the ever-popular Beach Olympics sponsored by Kolene, the coveted Annual Awards Luncheon, and informative programming, CCAI delivered another extremely successful Annual Meeting. Check out some of the highlights of our CCAI members on the next page.

CCAI members can review the presentations from the meeting in the MEMBERS ONLY area of the CCAI website. Members must log in to the website to gain access to this area. You’ll find the Annual Meeting Presentations located in the first link on the MEMBERS ONLY landing page. Call Leslie at CCAI (859-356-1030) if you need assistance accessing the presentations.

CCAII Chapter Awards

During the Annual Meeting, CCAII held its Annual Awards luncheon which is when we honor our Chapter User and Supplier of the Year members. User and Supplier members are recognized for their year-long service and dedication to their respective Chapter. CCAII is grateful for the support of all the chapters.

CCAI Staff Member Leslie Muck (r) congratulates Southern California Chapter User of the Year Shivie Dhillon of Sundial Powder Coating.

Lifetime Achievement Honor Awarded to Robert New

CCAII is very proud to have posthumously bestowed our highest honor, the 2015 CCAII James and David Wright Lifetime Achievement Award, upon Robert New. Bob was a long time CCAII member of the Wisconsin Chapter and worked at Broan Manufacturing for many years. He was a true CCAII champion who served on both the National and chapter Board of Directors, organized chapter golf outings each year and committed his career to electrocoating processes and improvements for his company. He truly believed in CCAII’s mission and worked hard to promote the association. Wisconsin chapter member, Larry Melgary remembers Bob, “If you looked in the dictionary for the definition of gentleman, Bob’s picture would be there. Bob was always enthusiastically contributing to the boards he served on, both the National and Wisconsin. Bob was the perfect example of CCAII User of the Year, which he won several times for the tours and support he and his company, Broan, gave to educating others in electrostatic spray and e-coat applications. He was an outstanding ambassador for CCAII.” The Wisconsin Chapter presented the award to Bob’s family at their annual golf outing last month.

Bob New’s daughter, Maria, accepts his Lifetime Achievement Award at the Wisconsin Chapter golf outing.

WEBB-STILES offers more than 60 years of practical expertise in the Overhead Conveyor and Custom Engineered Conveyor Systems. Whether you are looking for a new system or having problems with a current system, contact a WEBB-STILES Sales Engineer for all your Conveyor needs.
### CCAI’s FABTECH FINISHING Pavilion is Packed!

Three months before the show opens, CCAI has sold out its FABTECH FINISHING Pavilion with more than 210 exhibiting companies. This will be the largest FINISHING Pavilion in CCAI’s six years as a FABTECH partner. CCAI has packed the FINISHING Pavilion with exhibiting companies that will bring countless products, services, innovative ideas and equipment to finishers interested in all finishing technologies. You will find more companies providing more finishing products and services than any other event in North America. CCAI continues to prove that the FINISHING Pavilion at FABTECH is the premiere event for industrial finishers!

CCAI’s FINISHING Conference Program is Set – REGISTER NOW and save 30%!

CCAI is now in its sixth year of outstanding FINISHING Educational sessions as a part of the FABTECH Conference program. CCAI has developed a program to enhance your experience at FABTECH and deliver relevant, timely education. You’ll find a good mix of beginner, intermediate and advanced sessions available. Basic sessions include powder coating, electrocoating, system design, cleaning & pretreatment and running efficient paint systems. There will be sessions covering finishing essentials such as how to achieve excellent finishes, getting hooked on paint racks, manual powder coating and finishing operations impact on our environment. And NEW this year, CCAI is offering a Spray Painting Workshop which provides hands-on training for attendees to improve finishing techniques on virtual reality spray equipment. Training will cover the fundamentals of spray application and focus on best practices to optimize spray technique to improve productivity, reduce rework and defects, and decrease air emissions.

CCAI is also excited to offer a 30% discount on any FINISHING conference session. Use the promo code SAVE3CC when you register online. Check out the complete CCAI conference lineup below and visit www.fabtechexpo.com and click the EDUCATION tab for full descriptions of all the educational sessions.

**CONFERENCE CANCELLATION POLICY:** Cancellations must be made in writing and faxed to Attn: FABTECH Conference Cancellation at (313) 425-3407 no later than October 26, 2015 to receive a full refund minus a $50 administrative fee. Cancellations received after this date are non-refundable. Substitutions allowed.
Axalta Coating Systems

Axalta presents AR400 Arcadia Silver, a new architectural grade multi-use bonded metallic, indoor/outdoor, premium weathering silver metallic in the Alesta architectural color pallet. Arcadia Silver incorporates superior weatherability, elasticity and abrasion resistance in a low gloss, bonded metallic that requires no clear coat. Arcadia Silver meets AAMA 2604 requirements, and is a multi-use product suitable for application on an array of surfaces.

ChemQuest Inc.

ChemQuest Inc. is a provider of Industrial Chemicals as well as Custom Finishing Systems. Our Industrial Chemicals help provide solutions for the automotive, medical, military, office furniture and many other industries. We offer a variety of cleaners, phosphates, lubricants, inhibitors and specialty glycol products. ChemQuest Finishing Systems provides custom industrial equipment such as; paint and powder booths, headers and risers, pumps industrial ovens and a variety of industrial washers.

DuBois Chemicals

DuBois presents Pearl-Z bactericide-free metalworking fluids are built for safety and performance. Pearl-Z’s advanced formulation controls biological growth and eliminates odor without the use of additional chemicals. Pearl-Z fluids extend tool life and reduce fluid consumption without the health, safety and environmental concerns associated with these additives.

Website: www.kmisystemsinc.com

THE KMI MISSION is to engineer, design and build paint and porcelain enamel finishing systems at a reasonable cost and within the project schedule. These systems must be reliable, environmentally friendly, require low maintenance and low operating cost and produce high quality finishes. Our commitment to customers doesn’t end with the system. We continue relationships with ongoing technical support and assistance after start up. We achieve customer satisfaction so consistently that our customers insist on becoming repeat customers!
Finishing Brands
Finishing Brands, manufacturer of DeVilbiss industrial finishing equipment, announces the availability of the DeVilbiss CLEAN™ product line to industrial customers.

Ransburg has unveiled two new lightweight and ergonomic electrostatic applicators in a high performance package: the new RansFlex RX and RFX applicators.

Binks GEMS is a new advanced 2K mixing system using a simple design that combines an intuitive user touchscreen interface with data collection and analytics.

Binks’ new DX70 series of air operated 1:1 ratio diaphragm pumps are built for direct feed to a single spray gun and include a built-in fluid regulator.

Binks Trophy series of spray guns brings a unique combination of a lightweight, ergonomic design with robust engineering.

Fostoria Process Equipment
Fostoria Process Equipment will display new construction features for fully assembled paint and powder batch ovens and spray booths; as well as features of the larger, modular ovens and booths that are shipped unassembled and erected on-site at customer facilities. Also on display: Fostoria’s paint and powder system capabilities as well as the latest in infrared technology as applied to many paint and powder operations for boost, dry-off, gel and total cure.

Hubbard-Hall
Hubbard-Hall’s Emerald Paint-Prep 380 NP is a zirconium conversion coating formulated for the treatment of steel, zinc and aluminum surfaces in multistage spray systems. Emerald Paint-Prep 380 NP provides a microcrystalline surface in the nanometer (10-9 nm) range.

Intek Corporation
Intek Corporation will be showcasing our patented OM (Oven Modular) electric infrared heaters and custom manufactured oven systems. Modular flat panel heater design allows for maximum flexibility in any oven application as well as superior ease of installation.

IntelliFinishing
IntelliFinishing will provide a live demonstration that shows a part travelling on our friction-driven (NO CHAIN) conveyor through the wash and oven. Bring your system requirements and we will design a layout within minutes using 3D animation software. You will be able to see a system come to life and make adjustments to the design on the spot with our technical staff. See how IntelliFinishing systems are lean, decrease floor space, and reduce waste with minimal downtime and maintenance. In addition, our systems utilize the latest automation technology for tracking parts and processes.

KMI Systems Inc.
KMI is proud to announce the addition of hoist finishing systems to our long list of finishing systems capabilities. This includes hoist pretreatment systems and hoist e-coat systems. These systems are designed in house using the latest 3D modeling and FEA software. Hoist capacities range from less than a thousand pounds up to multiple tons. From a simple one hoist system to a complex multiple hoist system, KMI can be your one stop shop for all your finishing needs. KMI can also retrofit your existing finishing system.

Midwest Finishing Systems
Midwest Finishing Systems manufactures turnkey powder coating systems including custom built pretreatment washers, dry-off and cure ovens, conveyor systems, and environmental rooms. We deliver long-term value to our customers with unique modular design, quick installation, custom controls, and unmatched energy savings. Our applications lab allows customers to test parts to verify the best pretreatment and cure process has been developed.
Mighty Hook

Mighty Hook PowderPeg™ Rack is the most flexible, inexpensive and easy-to-use rack available! The patented design incorporates vertical uprights made from 3/4” square, 18 gauge mild steel tubing with holes every 4” for 30”, 36”, 42”, and 60” lengths. Holes are spaced every 3” for 72” lengths. The vertical tubes can be ordered with holes on one side or two. Other lengths and hole spacing are available by custom order. The top “U” tube is made from 5/8” square tubing and slips into the 3/4” tube. Holes are strategically placed in the top U for single or two-point hanging. The patented cantilever design provides internal grounding and requires infrequent stripping. Stock widths are available in 20”, 25”, 30” and 40”.

Pneu-Mech

Pneu-Mech manufactures custom washers for surface preparation solutions that are designed to work with the customer’s production, finishing and footprint requirements. As a component in a finishing line, Pneu-Mech washers remove oil, grease and other contaminants from the manufacturing process prior to the application of a wet or powder finish. Custom designed to clean your product – fabricated from carbon steel or stainless steel. One stage to multiple stage washers – ease of maintenance designed into every unit.

Richards-Wilcox

Richards-Wilcox Mono-Cart features a floor mounted monorail conveyor track complemented with two top guiderails for cart adjustability for finishing applications. Rail adjustment segments are located wherever a tight tolerance operation is required such as robotic painting or load/unload areas specially designed carts support loads up to 300 pounds and have 8 smooth operating wheels that provide vertical and lateral stability for the parts being finished.

Sames - EXEL North America

EXEL North America, Inc., manufacturer of SAMES Manual & Automatic Powder Coating Equipment & Solutions has designed the New InoBell® Powder Bell Applicator. The InoBell® is a high transfer efficiency applicator that delivers higher first pass transfer efficiency, better uniformity, and high finish quality.

EXEL North America, Inc. will also feature the New NANOGUN MV - Manual Electrostatic Low Pressure Spray gun. The new NANOGUN MV is designed for spraying both 1K and 2K solvent and waterborne materials.

Sherwin Williams

With 30 minutes dry to touch, 75 minutes dry to handle and one-coat application, the KEM AQUA® 8710 Water Reducible Enamel system increases throughput efficiency. KEM AQUA® 8710 also passes 100 hours salt spray at 1.2 DFT. KEM AQUA® 8710 is offered in a broad range of colors and glosses.

Metal finishers can save time and money with Powdura OneCure™, a two-coat, one-cure, dry-on-dry system that reduces the steps needed to achieve enhanced edge coverage and corrosion resistance. Powdura OneCure™ offers patent-pending formulated primers and topcoats that co-react and cross-link to provide a strong, seamless finish that delivers high quality aesthetics and durability.

Therma-Tron-X, Inc.

Therma-Tron-X, Inc. designs, fabricates, and installs innovative, custom, paint finishing systems. TTX offers turn-key services for its customers including research and development, inventive solutions, quality workmanship, project management, superior service and spare parts. TTX Environmental develops water and wastewater treatment systems that minimize operational costs and environmental impact of manufacturing and coating processes.
Electrocoating Seminar

CCAI is once again partnering with the Electrocoat Association to host the 2015 Electrocoating Seminar, to be held at the Sheraton Detroit Novi Hotel in Novi, Michigan on September 22-23, 2015.

An Introduction to Electrocoating will kick off Day 1 of the classroom-style program, providing some basic electrocoating knowledge to bring attendees up-to-speed with the technology before tackling more advanced topics in the remainder of the seminar. The discussion will center on efficiency, reducing production and non-production costs and overall system effectiveness in the different areas of an electrocoating process. Industry experts will move through an e-coat system to expose typical areas of energy, waste and cost savings per component, while also discussing ways to maximize efficiency through racking, enhancements, etc. Troubleshooting for defects that could possibly plague a system will be discussed and illustrated with actual examples available for inspection. Day 2 will include additional classroom instruction followed by a trip to The Henry Ford Museum for a tour of the Ford Rouge Factory.

With an evening networking event, attendees will be able to meet the presenters and ask questions specific to their company’s needs; refreshments are included.

Registration for the Electrocoating Seminar includes educational program, networking reception, lunch and breaks, transportation to/from the plant tour (if available) and a copy of “Electrocoating: A Guidebook for Finishers” (a $79 value). CCAI members receive a discounted registration fee of $465, a savings of $30.

To review the complete Electrocoating Seminar program and to register, visit www.electrocoat.org or call Anne Von Moll at 1-800-563-8831 for a registration brochure.
CCAI News

CCAI 2015 Scholarship Recipients
The 2015 Matt Heuertz Scholarship winners were announced at the recent CCAI 2015 Annual Meeting in Delray Beach, FL. Each of the following students received a Matt Heuertz Scholarship of $1,500: Marissa White, University of Wisconsin Green Bay; Ryley Roeser, University of Wisconsin Eau Claire; and Mitchell Pagel, University of Minnesota. The Matt Heuertz Scholarship program is sustained by the National CCAI and donations from CCAI Chapters. For the past several years, CCAI has awarded scholarship money from the CCAI Matt Heuertz Scholarship Program to students at North Dakota State University who major in Coatings & Polymeric Materials. This year the National CCAI Board expanded the program to include all students in programs (technical schools, high school seniors and college students) geared towards coatings and finishing from around the country. As a result, CCAI received many qualified applicants and is excited to watch the growth of this program as it attracts bright new talent to the industrial finishing & coatings industry for the future.

Marissa White  Ryley Roeser  Mitchell Pagel

CCAI Announces 2015-2016 Board of Directors
CCAI is fortunate to have the leadership of the following individuals for the 2nd year of their term as National Board of Directors Officers for 2015-2016:

President: Kevin Coursin, KMI Systems – Northern Illinois Chapter
Vice President: Ron Lum, Coral Chemical Co. – Southern California Chapter
Treasurer: Bill Oney, American Finishing Resources – Wisconsin Chapter
Recent Past President: Sam Woehler, George Koch Sons LLC - Unaffiliated

In addition to the officers, serving on the National Board of Directors for the 2015-2016 programming year will be: Bruce Bryan, Mighty Hook – Northern Illinois Chapter; Shivie Dhillon, SunDial Powder Coatings – Southern California Chapter; Duane Fudge, Chemetall - Mid-Atlantic Chapter; Jim Gallagher, Harley Davidson - Wisconsin Chapter; Kevin Irving, AZZ Galvanizing – Iowa/Central Illinois Chapter; Loren Keene, Pneu-Mech Systems Manufacturing – Central States Chapter; Todd Luciano, Products Finishing – Greater Cincinnati Chapter; Jim Malloy, Kolene Corp. - Unaffiliated; Tim Milner, JIT Powder Coating – Twin Cities Chapter; David Scharphorn, ChemQuest Inc. - West Michigan Chapter; Tony Sclafani, AR Iron Inc. – Las Vegas Chapter; Mark Walsworth, Donaldson Co. – Twin Cities Chapter; Serving as Ex-officio Board members are; Larry Melgary, Northern Coatings & Chemicals – Wisconsin Chapter; and Bob Warren, retired – West Michigan Chapter.

Manufacturing Day is a celebration of modern manufacturing meant to inspire the next generation of manufacturers. Although Manufacturing Day officially occurs on Friday, October 2, 2015, any day can be a Manufacturing Day. Be a part of MFG Day by hosting or attending an event in your area.

PLATINUM CORPORATE MEMBER

Reliant Finishing Systems
2541 Hwy 67 South
Somerville, AL 35670
256-355-9000
www.reliantfinishing.com

Reliant Finishing Systems is a fast growing U.S. manufacturer of premium powder coating equipment. Based in north Alabama, Reliant Finishing Systems specializes in both batch and automated powder coating equipment systems, including powder coating ovens, powder spray booths, blast stations and pretreatment systems. Reliant is committed to providing the most efficient industrial coating equipment combined with dedicated support for the life of the equipment. Products Include: automated & batch coating systems, industrial powder coating ovens, industrial powder spray booths, blasting stations, industrial wash rooms, powder spray walls, electric powder curing ovens. Reliant services include: consultation and system design, on-site training, coating education classes, equipment repair and maintenance services.

CUSTOM COATER MEMBER

Detroit Wheel & Tire
1027 E 14 Mile Road
Troy, Michigan  48083-4527
248-251-0577
www.detroitwheelandtire.com

Detroit Wheel and Tire is a full service distributor and refinisher of factory OEM wheels. They specialize in providing factory OEM wheels to a wide range of customers, who include collision centers, automotive centers, new car dealerships, retail tire outlets, repair facilities and worldwide internet sales. They offer wheel refinishing & straightening, bright or black PVD Chrome coatings, custom powder-coating colors and more. Detroit Wheel and Tire services include powder and liquid painting, chemical stripping, curing, welding and wheel inspections.

Chapter Happenings

Central States
The Central States Chapter held their annual golf outing on June 9, 2015 at the Falcon Lakes Golf Course in Basehor, KS. A grand time was had by all attendees and the food was excellent. This year’s winning team included: Elliott Harvey and Brian Faulkner, Splashtacular, and Jason Hipper and Frank Laster, A1 Paint Powder and Sandblasting. Many other prizes were awarded for longest drive, closest to the pin, longest putt and closest to the pin. Special thanks to the hole sponsors: A1 Paint Powder and Sandblasting, Chemetall, Contrast Equipment Company, Diamond Vogel, George Koch Sons, Parker Ionics, Pneu-Mech Systems Mfg. LLC, Stoenner Finishing Consultants, Trimac Industries.

Las Vegas
The Las Vegas chapter held a very successful Advanced Powder Coating class in May. Despite the very warm temperatures, refreshments and fans kept the attendees comfortable, cool and hydrated. There were industry people from around the country who gathered for this hands-on training. The audience was engaged from beginning to end and the chapter received great feedback on the seminar.

Attendees listen intently to Marty Powell’s presentation during the Advanced Powder Coating training.

Check the EVENTS tab on the CCAI website for upcoming chapter events!

“Shhhh... IntelliFinishing is my company’s competitive advantage.”

80% of our customers say the IntelliFinishing System is their best-kept secret.
Chapter Happenings

Northern Illinois
The Northern Illinois Chapter had 68 golfers on a beautiful day at the Blackberry Oaks Golf Course. There were participants from NC, KS, WI, MI, OH and IL. Golf was followed by a buffet dinner, golf awards and raffle prizes. The chapter appreciates all of the companies that participated and provided sponsorships and gifts for the raffle.

Salt Lake City
Our new Salt Lake City Chapter put on another successful event with a plant tour hosted by Martin Door Manufacturing. Martin Door manufactures the “World’s Finest, Safest Doors.” They specialize in custom doors that come in a variety of colors, designs and materials, allowing home owners to find the perfect door for their home. The tour was conducted by the company’s Vice President of Sales, Shaun Murphy. Mr. Murphy shared his impeccable and extensive door knowledge and explained Martin’s new patented technology that will change how Martin Door builds their custom doors. Participants were able to see garage doors being manufactured and asked many questions regarding processes, machinery and construction of a door.

On a beautiful late summer day in the foothills surrounding Salt Lake City, 40 golfers competed in the first annual golf tournament. The event was well supported by our industry as well as many local companies. The teams celebrated the inaugural event over a BBQ lunch with prizes for the winners and a fun raffle.

Twin Cities
A total of 30 foursomes signed up to take part in the Twin Cities CCAI Golf Classic at Oak Glen in Stillwater, MN. It was a perfect day for the golf and dinner event.

Major thanks to Golf Classic hole sponsors & benefactors Associated Engineering, Chemetall, CCAI National, Coral Chemical, Cullen Equipment, Dubois Chemicals, GAT, JIT Powder Coating, MICI, Midway Industrial Systems, Parker Ionics, PEM, Powder Technology, Inc., Seacole, Sierra Corp., Single Source, Troy Chemical, and Therma-Tron-X. Special recognition and thanks to Single Source, Inc. (Pro Paint) for again setting up the Bloody Mary Hospitality Tent at hole #1. Also thanks to the numerous companies and individuals that donated all of the prizes that were raffled off after dinner.

The golf team awards went to 1st place winners Joe Meemken, Casey Jacobi, James Berglund, and Rob Douvier. 2nd Place winners were Shawn McCall, Steve Shafer, Peter Dority and Scott Rummel. 3rd Place winners were Erik Nelson, Chris Nelson, Mark Eraznus and Tim Dunbar. Thanks to everyone who participated.

The winning team from Coral Chemical Company. From (L): Peter Dority, Al Enrique, Shawn McCall, and Alan Breunig

Stephen Walters (Progressive Coating), Ron Cudzilo (George Koch Sons) and Bruce Bryan (Mighty Hook) pose on the course.

West Michigan

The West Michigan chapter presented a day-long seminar, **Powder Coating Start to Finish**. Attendees learned about the essential elements required to ensure the best chance of successful powder coating. The seminar covered the building blocks of a well-designed powder coating system, from pretreatment and cleaning, to powder application and recovery, to curing. Industry experts were on hand to provide all the information on making the right choices for systems and applications. Registration included a copy of CCAI’s newly printed Systems Design manual. One attendee commented, “I just received the system design book from the CCAI symposium. I just wanted to thank you. I’ve been going through it for the last few hours and it is very informative yet concise enough to where it won’t take weeks to digest the info. This will help us out a lot and it is very much appreciated. Thank you.”

The West Michigan chapter held another successful golf outing in August. Golfers enjoyed a great day at Scott Lake Country Club. The chapter also sold raffle tickets to benefit the CCAI Scholarship Program.

Wisconsin

In May, the Wisconsin Chapter held a plant tour at Big Systems in Menomonee, WI. Big Systems supplies equipment for 3-D Printing as well as wide format printers. Attendees heard a presentation covering various types of 3-D printers and the materials that products are “printed” from. They toured the facility and saw pieces of equipment up close, some of which were actually printing. Following that, the group had the opportunity to visit JR Prototypes, which is a company that has equipment from Big Systems and employs them to do rapid prototyping.

The **Jim Steffes Memorial Golf Outing** was held on July 10th at the Scenic View Country Club. It was a terrific day of golf and featured several scholarship awards with the recipients in attendance as well. The chapter offers scholarships that provide further educational support to those who qualify. The chapter was pleased to award the following scholarships to some very promising students: General CCAI Chapter Awards of $1,500 each to Ryley Roeser, Chelsey Bock and Brent Groubert; The Bob New scholarship of $2,000 in memory of longtime industry professional and chapter ambassador to Emily Garczynski; The James Steffes Award of $1,500 to Austin Wheaton; The David J. Wright Award of $1,500 to Marissa White; and The James F. Wright Award of $1,500 to Francis Roushar. CCAI congratulates the young talent recognized here and looks forward to seeing them at future CCAI events.

**Alesta®**

**The Global Color Collection**

**Architectural Powder Coatings**

- A wide variety of aesthetically pleasing colors and surface textures
- Meets AAMA 2604, Qualicoat and GSB standards
- Excellent weatherability, elasticity, impact and abrasion resistance
- Ideal for a wide array of surfaces
- Can be applied on aluminum or steel substrates
- High weather resistance and color retention
