Cambria Tour
December 8th, 2016

On Thursday, December 8th, the TC-CCAI invited members to join us for a tour of Cambria in LeSueur, MN. Cambria is a family-owned, American made producer of natural quartz surfaces. The company started in 2000 and is just shy of one million square feet and still growing. Cambria started shipping internationally two years ago. Attendees were able to follow the development process from where 20+ trucks deliver the quartz, powder and binder daily, to manufacturing and quality testing. The Quality lab tests all of the raw materials when they are delivered, as well as the finished product for impact, rupture, water absorption and abrasion. Cambria runs three shifts, 24/7 to produce 800-1200 slabs per day.

During the event, the Twin Cities Chemical Coaters Association collected donations for the Toys for Tots Campaign. In addition to the money and toys collected at the event, the TC-CCAI chapter generously sent along a $1000 check to support the mission of the U.S. Marine Corps program to provide Christmas gifts to the less fortunate children in the Twin Cities area. Officer Hawkins and Officer Olson were very appreciative of our donation.
