CCAI Conference Sessions

**Tuesday, June 16**

10:00-11:30am  
**C10-Getting Your Part Across – Material Handling Considerations**  
Chad Andreae, Therma-Tron-X

When choosing your method of Material Handling through your finishing system, it is important to consider the possibilities in the beginning as it will impact your final system design. This presentation will focus on the following criteria so that you will be able to better understand what material handling option might be right for you, System Productivity, Production Flexibility, Plant Floor Space Requirements, Part Size and Configuration, Maintenance, System Cost.

2:00-3:30 pm  
**C30-Powder Coating Best Practices – What System Do I Need?**  
Teddy Piepkow, Nordson Corp.

So you are ready to join the environmentally friendly world of powder coating. Congratulations! Now what? Spend time with Teddy learning about what determining factors you should consider when deciding what type of powder coating application equipment is best suited for your needs. Be prepared to learn about the value of spraying to waste compared to reclaiming through a cartridge collection system or a cyclone quick color change booth.

**Wednesday, June 17**

10:00-11:30am  
**C40-Installation of a Powder Coating System – A Case Study**  
Jason Gatton, Pneu-Mech Systems Inc. and Eve St. Amant, Rousseau Metal

What steps do you need to take to build a successful paint system? This session will give insight and strategies on creating a basic to very complex Paint System to meet the needs of your business.

2:00-3:30 pm  
**C50 – Masking, The Key to Quick Cost Savings**  
Christopher Malone, Caplugs

This presentation will discuss how using the correct masking for an application can increase production and lower costs. In most cases, customers are using inefficient methods or the complete wrong type of masking for their process or application. Examples and cost analysis on how using the correct masking can save money, time and allow for human resource reallocation will be shared. Different types of tapes and masking materials that work in different processes will be discussed.
