

Center of Physical Therapy Practice Excellence Resource Manual

*Advance
Your Clinical
Practice*

CPTA's Center of Physical Therapy Practice Excellence Resource Manual and Recognition program was designed to enhance and promote quality physical therapy practice.

By establishing a set of quality practice indicators, physical therapy clinics are provided standards of excellence for measuring performance. In addition, the program provides clinics with the necessary resources and guidance to become quality providers of physical therapy services.

To ensure best practice patterns and continuous quality improvement, physical therapy practices in California are encouraged to participate in CPTA's peer-review process. By exceeding quality standards, physical therapy practices will be able to promote themselves as meeting the highest principles of practice excellence endorsed by the CPTA and the profession of physical therapy.
