Mixed Methodologies in Research and Quality Improvement: At the Intersection of Numbers and Stories

Nyann Biery, Allison Brenner, Casey Gallimore, Laura Gano, Stephanie Trudeau

When qualitative and quantitative components are combined in thoughtful and intentional ways, they add depth and context to our understanding of health settings. The workshop will discuss various methods to include both qualitative and quantitative components in research projects.

Thursday, 10/22, 2-5 PM EDT.

Session A8: Treatment Programming and Evaluation For Pregnant Women with Opioid Use Disorders: Coordinating Service Efforts

Jessica Cheo, Catherine Williams, Jeffrey Noel, Sharah Spruel, and Clara Stevenson

We will teach you about the development, implementation and evaluation of a bi-state treatment program for pregnant and postpartum women with opioid use disorders and other substance use disorders.

Session B8: Strategies for Engaging Family in Managing Patients with Complex Care Needs using EMR/EHR Systems

Jennifer Hodgson, Thompson Forbes, Melissa Welch, Emily Tucker, Joseph Pye

We will teach you how to use the electronic health record’s portal feature to implement and study strategies for increasing family engagement.

Session C8: Evidence-based AI Interviewing – Effective and Cost-effective Integrated Screening, Assessment and Practice-based Research

Alan Malik

We will teach you how evidence-based AI and enable you to design a solution for your practice that covers detection, in-depth assessment, actionable results and potential research, outcomes and QI initiatives.

Session D8: Research Rigor as a Critical Component of Integrated Healthcare: Development, Implementation, and Evaluation of a Diabetes Pilot Program

Allison Brenner & Madi Knaub

We will teach you how to use mixed methods research to comprehensively evaluate programs, services, and interventions in your healthcare organization.

Session F8: Partnership for Academic Clinical Telepractice: Expanding Medications for Addiction Treatment in Integrated Practices Settings Throughout New Hampshire

Marcy Doyle, Dayle Sharp, Susan Nichols, Marguerite Corvini, Kelsi West,

“Using the Project ECHO model® we will teach you how to address stigma and bias within the telepractice learning community through case study development, advancing integrated behavioral health team knowledge and confidence of prescribing medications for addiction treatment.”

Session G8: Pay it Forward: Using Your EHR Data to Make Data-Based Decisions and Demonstrate the Value of Integrated Behavioral Health

Sean O’Dell, Monica Parik, Laura Cook

We will teach you how to use electronic health record (EHR) data to guide empirical questions, research, and quality improvement projects within a primary care setting.

Session J8: Raising the Ceiling: An Advanced Workshop on Publishing for Integrated Care Researchers

Nadiya Sundeji, Jodi Polaha, Jennifer Funderburke, Dan Mullen, Ian Bennett

We will teach you success factors for disseminating your research in peer reviewed journals.

Session K8: Translating Research into Meaningful Use of Assessments in Practice

Kate Cordell

I will teach you how assessments can be used to visualize a client’s story and to communicate that story across the multidisciplinary team, to assess the effectiveness of level-of-care algorithms, and to identify staff strengths and training needs.

(REC)Training Track Sessions & Extended Learning Opportunity (ELO) (REC Sessions Friday, 10/9-Saturday 10/10)
