Action Alert

We are in the midst of another exciting session in Springfield, Illinois. Grassroots mobilization is a foundational tactic to engage with our legislators and encourage action on behalf of the planet. For many years, Environmental Lobby Day (taking place on April 19th and hosted by the Illinois Environmental Council) has connected activists from across the state with their elected representatives in the Illinois General Assembly to effectively advocate for the state’s people and environment in Springfield.

We encourage Illinois residents who are interested in participating to sign up at the link below. Designed for those new to the process and returning advocates alike, IEC provides online training materials to guide participants through every step of the process.

The Nature Conservancy in Illinois submitted this action alert request.

The Government Relations Community considers potential policy engagements through a process that reflects current Chicago Wilderness Alliance initiatives and the political landscape. The Alliance’s mission is not policy driven. We acknowledge the advocacy work of our partner organizations. To ensure transparency and recognize that many of our partners vary in their respective policy positions, each ActionAlert/e-mail communication/etc. will delineate which organization said action item originated from.
Find out more about the Chicago Wilderness Alliance Government Relations Community and process.
