

## **Dr. Richard G. Barwell Available Course:**

### **Saturday, October 6<sup>th</sup> – 8:00 a.m. – 12:00 p.m.: Neurologically Based Chiropractic – The New Horizon (4 hour program)**

This course will be an exposure of the 8 critical questions regarding the Vertebral Subluxation which the profession has failed to answer. This course provides a look at how the new information in neuroscience fits into the Art, Science and Philosophy of Chiropractic. The primary program addresses brain function, the formation of compromised neural integrity and the effect the adjustment has in returning balance to the system. This new knowledge has also helped to define frequency, duration and intensity of care based on the neurological needs of the patient.
