

Dr. Robert J. Sinnott Available Course:

Sunday, October 7th – 8:00 a.m. – 12:00 p.m.: Human Adaptability and The Trajectory of Life (4 hour program)

This course will cover addressing the progress and circumstances relating to the Chiropractic profession and research done in the name of Chiropractic. Will review of the premises put forth as questions to research scientists by the founders of the Chiropractic profession and review of the most current research findings in science and neurology. Addressing the current findings in today's science and research relating to the Chiropractic premises of health (adaptability) and its loss as well as discuss and focus on research findings aligned with the Chiropractic profession with information and examples from research relating to Chiropractic care, clinical decision-making and patient care. Current research focused upon Chiropractic & adaptability metrics and then there will be opportunity for question and answer at conclusion.

Dr. Robert J. Sinnott DC, LCP, DPhCS, FPhC, FICA (hon)

Doctor of Chiropractic

Dr. Rob Sinnott is a noted Chiropractic speaker in the areas of Chiropractic philosophy, neurology, and clinical practice and has authored numerous works in those areas. He served as the Chairman of the Council on Chiropractic Philosophy of the International Chiropractors' Association. He published the Green Books on CD-ROM in 1997 and since that time, this significant effort has become an acclaimed resource for the Chiropractic profession around the world. His Sinnott's—Textbook of Chiropractic Philosophy was published in 2009 and is being used in Chiropractic schools around the world. The recently published Textbook of Human Adaptability has also begun to be recognized by not only the Chiropractic profession, but from leading researchers across three continents as well. He graduated with Research Honors from the Palmer College of Chiropractic in 1989 and in the following twenty-eight years has received many honors and awards for his efforts on behalf of the profession. Dr. Sinnott has earned the Legion of Chiropractic Philosophers degree in 2000, his Diplomate in Chiropractic Philosophical Standards (DPhCS) in 2005 and became one of two Fellow of Chiropractic Philosophy recipients in 2010. He has been involved in designing, teaching and hosting the Chiropractic Philosophy Diplomate (DPhCS) program since its inception. He began the Adaptability Research Symposium to bring cutting-edge researchers from around the world to address our profession in 2014, 2016, and again last weekend in Chicago. With his wife Gail (who does all the work and gets none of the credit), he maintains a private practice in Frankfort, Ill.
