

NATIONAL ASSOCIATION OF
CHRONIC DISEASE DIRECTORS

Promoting Health. Preventing Disease.

July 2018 State Pulse Poll Results

The NACDD State Pulse survey was designed to collect feedback on pressing issues that Chronic Disease Directors and health promotion departments are facing today.

Do you have the information you need to identify and address the disparities people with disabilities face in your community?

How much of a priority is addressing the needs of people with disabilities in your chronic disease work?

**"Health equity is a priority for us, including addressing the needs of people with disabilities."*

**"It is important, but there is no funding to support the efforts."*

35% of states polled participated

This survey was distributed to 59 directors of chronic disease programs for State and Territorial Health Departments. Respondents are members of the National Association of Chronic Disease Directors. For more information on this survey, please contact Tamika Smith at tsmith@chronicdisease.org.
