The National Association of Chronic Disease Directors (NACDD) Diabetes Council includes more than 270 Members. The Council supports State Health Departments in implementing diabetes prevention and control strategies funded by the Centers for Disease Control and Prevention’s (CDC) Division of Diabetes Translation DP18-1815 and DP18-1817 cooperative agreements.

DP18-1815: CDC funded 50 states and the District of Columbia to improve the health of Americans through prevention and management of diabetes and heart disease and stroke.

DP18-1817: CDC granted 29 awards to State and Local Health Departments to design, test, and evaluate innovative approaches to address the significant national health problems of diabetes and heart disease and stroke.

NACDD works collaboratively with CDC to help ensure that Diabetes Council activities align with national objectives. State Health Department staff working in diabetes automatically are Members of the Diabetes Council. Members who become actively involved in the Diabetes Council benefit from access to networking, trainings, and other opportunities that support implementation of diabetes objectives.

Benefits for Diabetes Council Members
- Leadership and professional development opportunities
- National webinars on emerging topics
- Mentoring opportunities for guides and learners
- Learning communities to exchange ideas with peers in other states
- Travel scholarships to attend workshops and conferences
- Networking with colleagues from across the United States

About the Diabetes Council Leadership Group
The Diabetes Council is led by the Leadership Group, an elected body of representatives from State Health Departments. The Leadership Group acts as a collective voice for change, inspiring strategic action for diabetes prevention and control. The Leadership Group is a conduit between the CDC and State Health Departments, making it easier for states to fulfill grant requirements and achieve success. The Leadership Group includes liaisons that meet with other NACDD committees or external organizations that may bring value to the Diabetes Council. Liaisons help identify cross-cutting issues, support
information sharing, and leverage opportunities for collaboration. NACDD provides guidance, fosters leadership, and enables the Leadership Group to set and achieve goals that benefit all State Health Departments.

**Diabetes Council Leadership Group Elected Positions**

- **Executive Team:** Chair, Chair Elect, and Immediate Past Chair (3)
- **Co-Chairs:** Professional Development Workgroup (2)
- **Co-Chairs:** Mentoring Workgroup (2)
