www.accessitlibrary.com**

You've heard the buzz about Accessit Library, come and see it at the CILIP Showcase.

So much functionality

As well as searching, students can renew, reserve, book, read and write reviews, and create citations. They can even check their account for items currently on loan and items overdue, see their lending history, reviews, and more.

Unleash the power of Accessit One Search

With One-Search, teachers and students can check all local and online content with a single search. Results can also be pulled from other sites such as public libraries, websites and online databases. The system integrates seamlessly with your online subscriptions and supports single sign on – which saves signing in and out of each service individually.

Applied Network Solutions Ltd (Amlib UK)
Unit 8, Prisma Park
Berrington Way
Wade Road
Basingstoke
RG24 8GT

01256 300790
david.johnston@answeb.co.uk
www.247lib.com
www.answeb.co.uk

247lib.com is a fully featured, integrated multilingual library management system suitable for charity, college, corporate, health, legal, public, school, university and special libraries.

247lib.com is intuitive: offering easy search, engaging web pages and flexible reporting. 247lib.com is natively cloud based, but can be installed onsite, or delivered 'ready to run' on a computer. 247lib.com will run on mobile devices such as tablets, mobile phones as well as PCs, so you can manage your collections from anywhere and at any time.

247lib.com is designed for libraries of all sizes and allows you to manage all types of items including books, ebooks, periodicals, ejournals, room bookings, PC bookings, documents, web pages, news, events, discussions, training courses and more.

247lib.com is standards based, and uses MARC 21, Z39.50 and other relevant international standards.

Start with a blank sheet and let your 247lib.com online website design excite and reflect the branding and special attributes of your library.

247lib.com is developed in the UK and may be purchased from Amlib UK, the G-Cloud or through the ESPO framework 350-19 Library Solutions and Systems.

247lib.com supports GDPR fully with tight user control over all personal data, so your data is secure.

FOLIO is LIVE and running libraries! It's available as a full library system and as an ERM – come see!

FOLIO offers you the world's most dynamic and modern library services platform, delivered and supported by EBSCO and our partners. This solution provides a comprehensive, integrated suite of library management software that supports key management, circulation and end-user functions.

- Maximise work-flows and processes through services designed to integrate and interoperate, sharing system-wide information as appropriate and reducing the instance of redundant tasks, including the ability to manage electronic, print, multimedia and digital resources in the most efficient way.
- Enhance students' learning experience with increased discovery functionality for users through apps, widgets, custom linking and the integration of third-party service modules through the FOLIO platform.
- Free up resources with tight integration with other academic services, platforms and other micro-services through a platform built for choice and extensibility allowing any library, developer or service provider to offer services and support applications through FOLIO. This creates an environment that will maintain and increase resource-sharing opportunities through an agile platform that allows for the adoption (purchase) and/or removal of tools and resources as needed, such as learning management systems, e-resource platforms, a multitude of third-party applications and other technologies not yet emerged.

EOS International (a SirsiDynix company) is a market leader in library management systems for the special and smaller libraries market, with the expertise to provide affordable, next-generation, scalable on-premise and cloud solutions. We are a client-driven, market responsive company, delivering cost-effective products and services. Our web-based EOS.Web system is cross-browser compatible and provides easy access to information for corporate, academic, legal, medical and government libraries throughout the world. EOS was the first to bring Microsoft.NET technology to the industry. Functionality in EOS.Web includes:

- A 100% web based solution for all functionality: staff and end user.
- Feature rich modules: OPAC Discovery, cataloguing, circulation, serials management and acquisitions for day to day-to-day management of your library collection.
- Additional features including Indexer, SSL encryption, IP authentication, web services and Reference Tracking for coordinating research requests and classification management for secure information.
- Cloud hosted solution.

sales@isoxford.com
www.isoxford.com

Heritage Cirqa is a market leading library management system, featuring a set of core and add-on modules. It is a perfect match for most small and medium sized libraries. Whilst many of our users are educational, for instance over 50% of UK FE colleges use our software, other users include institutions, societies, medical and workplace libraries as well as schools and sixth form colleges.

IS Oxford is an employee-owned company and is currently undertaking a major UX research investigating into changing attitudes towards the curation and provision of resources for contemporary users. We'd love to chat to you about your requirements. Heritage Cirqa is available under interest-free payment terms and all our operations are exclusively UK-based. We offer a fully-managed hosting service or it can be installed and managed locally. Comprehensive, sophisticated and flexible, Heritage Cirqa can meet your requirements now, but because upgrades are frequent and free of charge, it will remain future-proof and affordable for years to come.

www.ptfs-europe.com

We will implement, host and support your open source Koha library management system. Other products we host and support provide enquiry management, discovery and electronic resource management and resource booking. With you we will put in place a system that helps your users access your resources and does everything your library needs to manage its collections.

In partnership with EBSCO, we can also implement, host and support the open source FOLIO library management platform. As an ISO27001 company, we are experts in the handling and security of your data and use processes designed to give you the support and reassurance you need.

Working in partnership with libraries, SirsiDynix helps communities thrive by connecting people with information resources that educate and inspire. Our BLUEcloud library services platform delivers the Best Library User Experience through attractive mobile and web interfaces, coupled with open, feature-rich LMS functionality and enterprise-ready analytics. Our solutions cater for public, academic and special libraries, large or small, including the biggest consortia in the world.

SirsiDynix offers libraries the comprehensive, best-of-breed and fully integrated *BLUEcloud* library services platform, whose functionality includes:

- *SirsiDynix Symphony*, a proven, robust, fully customisable LMS, providing web based access to day-to-day management of circulation, acquisitions, serials, digital assets, electronic resources and library users plus analytical business tools.
- *SirsiDynix Enterprise* resource discovery platform, integrating with the EBSCO Discovery Service to provide one-click access to full text, and with popular ebook lending platforms like 3M Cloud Library, Askews and OverDrive. Enterprise functionality includes a range of self-service tools including support for ILL and postal loans, and complementary apps for use on tablets and smartphones.
- *SirsiDynix SaaS* hosting facilities, removing the need for libraries to purchase and maintain their own servers.

SirsiDynix also offers the EOS.Web library management system, including a fully Web-based interface and functionality specifically designed for special libraries.

Soutron Limited
The Lodge
Highgate House
Burley Hill
Derby, DE22 2ET

01332 844030
info@soutron.com
www.soutron.com/cilip

Soutron is more than a LMS vendor. We are trusted advisors to hundreds of special and corporate libraries, innovating ways to bring fresh new capabilities and solutions to library, archive and information managers.

Bringing Archives, Digital Resource Management, Inter-Library Loans, Serials & Acquisitions Management and much more, all under one umbrella. Working with Soutron you will find that we collaborate with our clients, sharing experience and knowledge, to build and develop applications to suit their individual needs.

Soutron is designed for use by corporate special libraries, archives and establishments seeking knowledge service solutions from any sector of government, commerce and education. Our software is cloud-based, fully web browser and mobile ready. Like open source systems there is no software licence fee applicable with Soutron. The database can be flexibly applied to a wide variety of needs. Functionality is in place for library management, archive management, records management, image (picture) and hosted audio video management, knowledge services, skills and expertise registers and inter library loans. We look forward to welcoming and meeting you in person.
