

**Over 280 potential employers
with more than 25,000
employees across Canada and
growing!**

Career paths for all types of
graduates and employment seekers.

**MANUFACTURING.
DISTRIBUTION. SALES.**

Consider a career in manufacturing,
distribution or sales for the plumbing,
hydronic heating or pipe, valves and
fittings industries. A huge demand PLUS
an aging workforce means that career
positions are waiting to be filled.

Industry members know that a diverse
workforce benefits employees
and is good for business.

Installer

Canada's plumbing and heating industry members manufacture, distribute, sell, install and maintain plumbing and heating products for houses, apartments, condominiums and all types of commercial buildings.

Commercial and residential construction and renovation results in a never ending need for our industry's products and people.

You can make a difference - most organizations have Corporate Social Responsibility programs.

DID YOU KNOW?

The Plumbing and Heating Industry generates over \$7 billion per year in Canada directly employing over 25,000 Canadians in a diverse and exciting range of professional occupations. Alternative strategies for waste reduction, water conservation and innovative heating systems are currently being developed, tested and deployed by talented young men and women throughout the industry.
