Axiom Industries

Axi-Pump Condensate Pumps automatically remove the condensate fluid produced from HVAC appliances like air conditioners and dehumidifiers. Unlike others, Axi-Pump Condensate Pumps can withstand the acidic condensate generated by high-efficiency fuel-burning appliances like furnaces, boilers, and tankless water heaters. Superior performance and reliability set a new standard for Condensate Pumps in the Canadian market.

Product Category: Hydronic Heating

Date Product was introduced to the Canadian Market: August 2021

Is this product CSA (or equivalent) approved? Yes

What is innovation or amazing about this product? The AP23-S features a higher lift than competitors, a low power draw motor, high-level safety switch, quiet operation, and corrosion resistant material suitable for use with fuel-burning condensing appliances.

This product is: Energy Efficient
