

Kathryn Kubossek has been the Coordinator for the BC Region of CIPH since 2009. Kathryn has many years of experience in association management and thoroughly enjoys working with CIPH and its members. Kathryn works from her home office and is the Manager for the Thermal Environmental Comfort Association (TECA), which is another association in the heating industry which shares mutual initiatives with CIPH. Most important, is that she works with a great group of volunteers who work so very hard for the betterment of our industry!
