

## Maintenance and operation of strategic infrastructure

Maintenance and operation of strategic infrastructures, including:

- Energy production, supply, transmission, transportation and distribution (hydroelectricity, fossil fuels, wind energy, biomass energy)
- Maintenance of essential public infrastructures in proper working order (bridges, municipal buildings, etc.)
- Construction, maintenance and upkeep of essential activities in connection, in particular, with public and private infrastructures that may create a risk for public health and safety (private dams, management of hazardous and radioactive waste, etc.)
- Sanitary services and supply chains (for example water treatment plants)
- Computer resources (security, maintenance, urgent needs in the current situation)
- Data centres

## Priority manufacturing activities

Priority manufacturing activities, including:

- Food production (for example agricultural operations, food processing, drink production, slaughterhouses, market-garden vegetable production)
- Production of inputs necessary for priority sectors
- Pulp and paper sector
- Manufacture of medical instruments
- Manufacture of chemicals
- Manufacture of sanitary products
- Manufacture of micro-electronic components
- Industrial facilities (in particular in the aluminum sector) and mining facilities, which must reduce their activities to a minimum
- Manufacturing and maintenance in the defence sector

## Construction sector services

Construction sector services, including:

- Construction firms, for emergency repairs or to ensure safety
- Electricians, plumbers and other trades (emergency services only)
- Equipment rental firms
