

Associate Safety Professional (ASP) Examination Preparation Workshop

Colorado Safety Association will be hosting an **Associate Safety Professional™ (ASP) Examination Preparation Workshop** presented by SPAN™ International Training LLC. The ASP is the first test required in the two-test process of becoming a Certified Safety Professional® (CSP). The five-hour computer delivered test consists of 200 questions designed to measure the academic knowledge expected of the entry-level safety professional.

This workshop will prepare you for the Board of Certified Safety Professionals' Safety Fundamentals Examination, which leads to the ASP designation. You will review more than 500 problems addressing the complete examination blueprint. At the completion of the ASP prep workshop participants will learn to:

- Determine whether you are ready to attend the Safety Fundamental Examination
- Identify areas where additional preparation is needed
- Design an individual study plan that ensures exam success
- Obtain answers to questions about core exam materials
- Become familiar with resources available to prepare for the exam
- Utilize information about certification requirements and scoring procedures in your test preparation
- Review content material utilizing a testing format

The SPAN™ workshop materials include: a two-volume set of workbooks, BCSP approved calculator, notepad, pencil, pen, highlighter and a six-month membership to the exam prep online learning management system, CertBok®. Your six-month access to the CertBok® membership is activated upon registration, however, you may delay your membership activation by contacting us. Your workbooks, calculator and other workshop supplies will be given to you at the workshop. (Workbooks and CertBok® membership are a \$400 value!)

Course Location:

Colorado Safety Association
1114 West 7th Avenue, Suite 150
Denver, CO 80204

Course Pricing:

\$950 Per Registrant
