

Specs and Guidelines

Audience: USCC Members (compost producers and organics haulers, municipal recycling/waste managers, researchers, suppliers, compostable products manufacturers, industry allies)

Topic Examples:

- Best practices for production and collection
- Compost market stories
- Community alliances to move compost infrastructure forward
- Contamination challenges and solutions
- Regulatory advances
- Legislative initiatives
- Unique ways compost producers and product manufacturers collaborate
- Characteristics for food scrap generated in various sectors and best practices

Word Count and Links:

We all have so much to say, but readers want things that are concise. Make good use of headers, numerals, bullets and hyperlinks to make it easier for the reader and please, stay under 400 words.

Membership and Authorship

You must be a USCC member to contribute to this blog. At the end of your piece, please provide a 40 word or less bio—this is where you should feel free to name your company, and what you do there.

Caution!

The blog is meant to be a place for fellow members to learn from what you have to say. We WILL edit blog pieces and share before posting, and we will not run blog posts that are promotional in nature.
