

VISION DEVELOPMENT & REHABILITATION

Vision Development & Rehabilitation is a quarterly journal featuring scientific, peer-reviewed articles in the fields of vision development and vision rehabilitation. The official publication of the College of Optometrists in Vision Development, Vision Development & Rehabilitation welcomes manuscript submissions from a wide variety of professionals engaged in the journal's fields of interest.

The mission of Vision Development & Rehabilitation is to serve as an authoritative source of information in vision development and rehabilitation through peer reviewed articles. The editor and journal review board will consider manuscripts in all aspects of related fields including, but not limited to: optometric vision therapy, cognitive rehabilitation, behavioral and developmental vision care, visual impairment, applied cognitive and visual neuroscience, behavioral and developmental pediatrics, occupational and physical therapy, learning and education. Reviews, case reports, and reprints will be considered, but priority is accorded to manuscripts of original research.

Appealing to a trans-disciplinary view of vision, the journal's review board is currently comprised of professionals from the disciplines of Optometry, Vision Science, Medicine, Occupational Therapy, and Biostatistics. Journal Review Board members are as follows:

Curtis Baxstrom, OD, FCOVD, FNOR
Private Practice of Optometry, Federal Way, WA
Consultant, Good Samaritan Hospital and Mary Bridge Children's Hospital

Chris Chase, Phd, FAAO
Professor, College of Optometry/Western University of Health Sciences

Kenneth Ciuffreda, OD, PhD, FCOVD-A
Distinguished Teaching Professor, SUNY/State College of Optometry

Michael Gallaway, OD, FAAO, FCOVD
Private Practice of Optometry, Marlton, NJ
Associate Professor, Pennsylvania College of Optometry/Salus University

Sarah Hinkley, OD, FAAO, FCOVD
Professor and Chief of Vision Rehabilitation Services, Michigan College of Optometry/Ferris State University

Neera Kapoor, OD, MS, FAAO, FCOVD-A
Clinical Associate Professor, Department of Rehabilitation Medicine, NYU Langone Physical Medicine and Rehabilitation Associates

Diana Ludlam, COVT
Associate Clinical Professor, SUNY/State College of Optometry

W.C. Maples, OD, MS, FAAO, FACBO, FCOVD
Private Practice of Optometry, Hattiesburg, MS

Mark Mintz, M.D.
Chief Medical Officer, CNNH NeuroHealth, Voorhees, NJ

Faculty Rutgers-New Jersey Medical School; Medical staff of Our Lady of Lourdes Medical Center-Camden, Weisman Children's Rehabilitation Hospital, Hackensack University Medical Center

G. Lynn Mithcell, MAS, FAAO
Associate Professor, College of Optometry/The Ohio State University

Maureen Powers, PhD, FCOVD-A
Senior Scientist, Director of Research at Gemstone Foundation, Rodeo, CA

Beth Rolland, OTR, CRDS
Occupational Therapist, Upstate University Medical Center, Fayetteville, NY

Jack Richman, OD, FAAO, FCOVD
Professor Emeritus, New England College of Optometry

Mitchell Scheiman, OD, PhD, FAAO, FCOVD
Professor, Pennsylvania College of Optometry/Salus University

Samantha Slotnick, OD, FAAO, FCOVD
Private Practice of Optometry, Scarsdale, NY

Barry Tannen, OD, FAAO, FCOVD
Private Practice of Optometry, Hamilton Square, NJ
Associate Clinical Professor of Optometry SUNY/State College of Optometry

The Editor's Advisory Board members are as follows:

Paul Freeman, OD, FAAO, FCOVD
Former Editor of Optometry

Dominick Maino, OD, MEd, FAAO, FCOVD-A
Former Editor of Optometry and Vision Development

Marc Taub, OD, FAAO, FCOVD
Current Editor of Optometry and Visual Performance

Our Editor-in-Chief is Leonard J. Press, O.D., and our Managing Editor is Katie Kirschner. Dr. Press can be reached at: editor@covd.org, and Ms. Kirschner at: katie@covd.org. The entire manuscript submission and review process is conducted through Editorial Manager via: <http://www.editorialmanager.com/vdr>. Distributed via digital format, the public has online access to all content immediately upon publication. VDR is indexed in the Directory of Online Journals using ISSN 2374-6416.

VDR Statements on Informed Consent, Human and Animal Rights, and Conflict of Interest

INFORMED CONSENT

Prior, written informed consent must be obtained from subjects or patients, and where applicable, that the research was approved by the appropriate institutional review board (IRB). Case reports or case series involving fewer than four patients do not require institutional review board approval. Submissions involving more than three patients, or that required a systematic chart review to identify patients should be reviewed by the appropriate IRB where applicable.

World Medical Association Declaration of Helsinki - Ethical Principles for Medical Research Involving Human Subjects

LINK:

<https://www.wma.net/policies-post/wma-declaration-of-helsinki-ethical-principles-for-medical-research-involving-human-subjects/>

These statements of consent from subjects or patients, and of IRB review should appear in the first paragraph of the Methods section of the manuscript.

HUMAN RIGHTS

The confidentiality of subject or patient information must be ensured by the authors. Subject or patient anonymity should be carefully protected and follow the guidelines for experimental investigation with human subjects or patients required by the institution(s) with which all authors are affiliated. Authors should mask any identifying facial features and remove participant names from images submitted for publication unless written consent permitting their use is provided along with their submission.

ANIMAL RIGHTS

Research involving animals must adhere to the policies stated in the ARVO guidelines on the use of animals in ophthalmic and vision research

LINK:

<https://www.arvo.org/About/policies/statement-for-the-use-of-animals-in-ophthalmic-and-vision-research/>

and must include a statement of adherence to these guidelines in the first paragraph of the Methods section of the manuscript.

CONFLICT OF INTEREST

Financial relationships that exist for all authors of a manuscript to any of the items researched that could influence the outcomes must be clearly stated. Such disclosures include author ownership of product of compensation by a third party for participation in the work.

Relationships include the role of sponsors or authors in subject or patient recruitment, study design, data collection, data analysis, project administration, and writing assistance.
