

## Diagnosis and Managements for Acquired Brain Injury and Concussion: Primary Concepts for Primary Care and Vision Therapy Optometrists

Presented by:

**Dr. Barry Tannen**

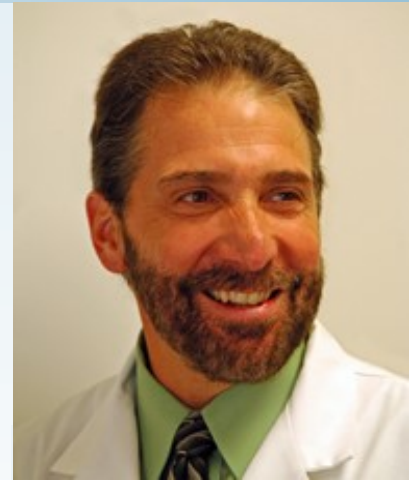

Millions of patients suffer acquired brain injury or concussion each year, including many of yours. In this course you will learn how to assess the effect of ABI/concussion on your patient's visual system both from a theoretical and practical perspective, as well learn how to implement a sound therapeutic treatment plan. You will learn:

- Epidemiology of ABI and concussion
- Typical effects of diffuse axonal injury on the visual system
- How to utilize symptom surveys to help aid your diagnosis
- How to modify your optometric exam for ABI patients
- Advanced diagnostic testing for ABI and concussion patients
- Practical optometric treatment considerations in ABI/concussion
- Basics of neuro-optometric rehabilitation: programming and procedures
- How to set up a concussion management program in your office or clinic
- Practice management considerations for ABI/concussion

Dr. Barry Tannen is in group private practice at EyeCare Professionals, PC in Hamilton, NJ, where his practice emphasis is the diagnosis and treatment of visual deficits related to acquired brain injury. He is also the program supervisor for a residency program in Vision Therapy and Neuro-Optometric Rehabilitation at EyeCare Professionals.

He is a Past President of the College of Optometrists in Vision Development (COVD) and an Associate Clinical Professor Emeritus of the SUNY/State College of Optometry in New York.

In 2016, Dr. Tannen received the A.M. Skeffington award for excellence in Optometric Writing from COVD. In 2014, Dr. Tannen received the "Ludlam Education Award" by the Neuro-Optometric Rehabilitation Association. Dr. Tannen lectures internationally and has written over 50 scientific papers.
