CPA's Division of Neuropsychology (Division VIII) presents:

Navigating Threats to Test Security: Current Steps

Presented by: Kyle B. Boone, PhD, ABBP-ABCN

Description:

This session covers the topic of test security. Information about best practices and methods for responding to issues related to the Randy's Trucking case, a landmark case which had a far-reaching impact on forensic psychologists.

After attending this event, participants will be able to:

1. Articulate the importance of test security in forensic settings.
2. List at least two steps to take when responding to a lawyer's request regarding test security.
3. Describe at least one ethical reason for protecting test security.

Kyle B. Boone, PhD, ABPP-ABCN, is a clinical neuropsychologist in private practice in Torrance, California. She served as Director of the Neuropsychology Testing Service at Harbor-UCLA Medical Center (1986–2008), was a tenured professor in UCLA's Department of Psychiatry (1997–2008), and later served as a full professor in the California School of Forensic Studies at Alliant International University (2008–2016).

Dr. Boone has authored more than 130 peer-reviewed publications focused primarily on neuropsychological assessment and the development and validation of cognitive performance validity tests. She has also authored, co-authored, or edited seven books, including the second edition of Assessment of Feigned Cognitive Impairment: A Neuropsychology Perspective (2021).

She has led several influential position papers on psychological and neuropsychological test security, including the 2022 American Academy of Clinical Neuropsychology (AACN) position statement and two 2024 Interorganizational Practice Committee position papers addressing attorney access to protected psychological test information.

Board certified in clinical neuropsychology (ABPP/ABCN), Dr. Boone is a Fellow of the American Psychological Association and the National Academy of Neuropsychology and served on the AACN Board of Directors through 2024. Her honors include the National Academy of Neuropsychology's Ralph M. Reitan Award for Clinical Excellence (2020), the American Board of Professional Psychology's Distinguished Service Award to the Profession of Psychology (2023), and the AACN Distinguished Neuropsychologist Award and the California Psychological Association Division 8 Outstanding Service to the Field of Neuropsychology Award (2025).
