Our Model

The Conference of Radiation Control Program Directors, Inc. (CRCPD) is a 501(c) (3) nonprofit, non-governmental, professional organization whose primary membership is comprised of radiation professionals in State and local government that regulate the use of radiation sources. However, any individual with an interest in radiation protection may become an Affiliate or International member.

The Conference of Radiation Control Program Directors (CRCPD) has five councils: The Environmental Nuclear Council, the General Council and Liaisons, the Healing Arts Council, the Homeland Security/Emergency Response Council, and the Suggested State Regulations Council. These five councils have more than 70 working groups consisting of volunteer members across the country researching a variety of topics pertinent to radiation protection.

CRCPD working groups are an integral part of developing radiation protection principles for the nation. They help shape national policy and guidance, work toward establishing best practices for radiation protection and provide support and expertise to federal partners.

Working group members develop strong working relationships with other states, share and increase their own technical knowledge, and bring the information shared by the CRCPD community to their own state programs.

Member Benefits

- Increased productivity for state programs that may have limited staff
- Collaboration helps to identify gaps in radiation control or new and emerging issues that warrant attention
- Innovation in solving problems that exist at both the federal and state level
- Helps radiation control staff expand their technical knowledge as they can learn from each other through interactions with group members, advisors and liaisons
- Facilitates the opportunity to create relationships with other state programs, federal agencies, and private partners, extending well beyond the term of membership
- Networking - sharing a common forum for exchange of radiological information and having a mechanism for communication with federal government and other organizations on radiation protection issues

Our Services

CRCPD working groups are an integral part of developing radiation protection principles for the nation. They help shape national policy and guidance, work toward establishing best practices for radiation protection and provide support and expertise to federal partners.
