

Conference of Radiation Control Program Directors, Inc.

Board of Directors Resolution

Relating to: Contributions of Jeana Fleitz in fostering a closer working relationship between the U.S. Environmental Protection Agency (EPA) and the state radon programs.

Whereas: Congress passed the Indoor Radon Abatement Act of 1988, which provided for a significant role for state government; and

Whereas: Following the enactment of the Radon Abatement Act, it was soon identified that there was a need to provide a forum for communication between the EPA and the states to better understand their respective roles in carrying out the requirements of the Act; and

Whereas: Jeana Fleitz was instrumental in seeing that this forum was established through her leadership while serving as Chairperson of the Radon Public Awareness Committee of the Conference of Radiation Control Program Directors, Inc. (CRCPD); and

Whereas: As a direct result of the recommendations and intensive groundwork performed by Ms. Fleitz, the All States Radon Conference was established in 1991 to enhance a better working relationship between EPA and state radon programs; and

Whereas: This radon conference has been very successful in the ensuing years, and has expanded in attendance to include many other organizations dealing with radon. Due to this expanded involvement of many organizations, the name of this conference has been changed to the National Radon Meeting; and

Now be it resolved that:

The CRCPD Board of Directors recognize and appreciate Ms. Fleitz for her meaningful contribution to the field of radon protection of the public both in her home state of Kentucky as well as nationally; and

Be it further resolved that:

Jeana Fleitz is recognized and appreciated for her years of support of the CRCPD; and

Be it further resolved that:

The CRCPD Board of Directors wishes Jeana Fleitz a pleasant and rewarding retirement.

Bestowed by the CRCPD Board of Directors this 26th day of July, 1999.

Original signed by Robert M. Hallisey, Chairperson, CRCPD
