

Seminar 2026 Session Spotlight Series!

Welcome to another installment of our [Seminar 2026](#) Session Spotlight Series!

As we prepare to gather at the Disneyland® Hotel in Anaheim from November 5–8, 2026, we are excited to highlight key educational sessions designed to equip health-system pharmacy professionals with high-impact, actionable knowledge.

✧ Session Spotlight ✧

Pharmacy Leading Transitions of Care in Tomorrow's Healthcare: A California Regulation's Ask

- Speaker: Donna Leang, PharmD, MSHS, BCPS, FCSHP
- Track / Category: Regulatory & Legislative | Application-based
- Target Audience: Pharmacists & Pharmacy Technicians

Session Overview

California regulations require pharmacies to perform admission and discharge medication reconciliation for high-risk patient populations. Published literature demonstrates that when pharmacy staff lead transitions of care (TOC) activities, it successfully prevents medication errors and reduces readmissions—translating

into fewer Medicare reimbursement penalties for high-risk populations over 65.

This session covers critical California regulations (SB 1254, AB 1503) and details pharmacy involvement in admission and discharge reconciliation. Attendees will walk away with concrete strategies for each TOC phase of care:

- Admission Medication Reconciliation
- Discharge Medication List Review
- Post-Discharge Follow-Up

Additionally, participants will learn the results of institutional TOC efforts over the last 10 years, gain an understanding of how to leverage pharmacy extenders (such as technicians and students) to scale programs, and review real-world case studies demonstrating improved patient outcomes through medication optimization.
